This report records the results of the sky matching between Redshift V4 and the tablet K8538 (the Planisphere).

The method used was to compare the sky on the tablet including the planetary positions with the night sky as shown by commercial astronomy programmes. This found eighteen possible dates that are summarised in table 1. Not all these sky matches are of equal quality and several wider arguments are used to arrive at the preferred date that are discussed in “A Sumerian Observation of the Kofels' Impact Event” (Bond and Hemsell, Alcin, 2008).

Table 2 shows the complete results of a search for the best date with the planetary positions on a year by year basis. The search involved looking at the 20<sup>th</sup> day after the last new moon during June/July period (Julian calendar date) as seen at 1.25 UT from Sumer for all years from 3500 BC to 2000 BC. The planetary positions were noted and compared with those shown in Tablet K8538. The requirements for a match were:

- One planet in Gemini
- Two planets in Cancer
- No planets in Pisces

Where match condition is met the entry is underlined in Table 1.

**Table 1 Planetary Matches with Tablet**

YEAR	Date	Cancer	Gemini	Taurus	Notes
<b>Good 4 Planet Matches</b>					
2222	29 June	Mercury Jupiter	Venus	Mars	Good match on positions and day lengths
2269	6 July	Mercury, Jupiter	Saturn	Mars	Jupiter and Mercury are rather close together not quite matching tablet. Good time match
3123	29 June	Mercury Jupiter	Saturn	Mars	Good match on positions and day lengths
<b>OK 4 Planet Matches</b>					
2361	4 July	Mercury Venus	Mars	Saturn	Mars not in a good position compared with Gemini sector. Good time match
2625	11 July	Mercury, Jupiter	Venus	Saturn	Venus not in a good position compared with Gemini sector. Timing possible but beginning to push assumed accuracy
<b>Poor 4 Planet Matches</b>					
2769	13 July	Mars Saturn	Venus	Jupiter	Mercury is also in Cancer and to get it below horizon is incompatible with times. Overall timing match poor
2829	16 July	Mars, Mercury	Saturn	Jupiter	Mars and Mercury too flat and too close for good Sunrise match. Saturn is not in a good match for Gemini Sector. Overall timing match poor
3196	26 June	Mercury Venus	Mars	Jupiter	Mercury Venus relationship does not match the Cancer sector at all. Jupiter a little too close? Timing Good
3480	14 July	Mars Mercury	Jupiter	Saturn	Venus is also in Cancer and to get it below horizon is incompatible with times. Overall timing match poor
<b>Good 3 Planet Matches- None</b>					
<b>OK 3 Planet Matches</b>					
2210	14 July	Mercury Jupiter	Saturn	-	Good planet match, Timing off
2799	15 July	Venus, Mars	Saturn	-	Saturn not quite right, Timing a little off
3087	19 July	Venus Jupiter	Mars	-	Planets OK but not good, Timing not so good
3181	8 July	Saturn, Venus	Mars	-	Planets OK but not good, Timing good
<b>Poor 3 Planet Matches</b>					
2756	18 July	Venus, Jupiter	Mars	-	Mercury in Leo and visible if timings correct. Overall timings a little off
3092	14 July	Mercury Saturn	Venus	-	Venus is not well placed compared to Gemini sector Jupiter in Aquarius, Timing not good
3164	1 July	Venus, Mercury	Mars	-	Planets are very badly positioned, Timing good
3418	18 July	Venus, Mars	Saturn	-	Cancer planets not good, Timing not good
3467	19 July	Mercury, Jupiter	Mars		Mars not well placed, Timing not good
