

Be green with the printer!

Follow these tips when using the printer and help save the environment and money too!

- 🌍 Put some energy into saving energy! Switch off when not in use, particularly at the end of the day.
- 🌍 Set the printer to print double sided. This reduces the amount of paper you have to buy!
- 🌍 There's no F in REFUSE if you REUSE - use the reverse side of miscopies to print draft copies or as scrap paper.
- 🌍 Use the blue bins to recycle used office paper.
- 🌍 Buy recycled paper. Every tonne of recycled paper saves 32,000 litres of water!
- 🌍 Paper doesn't grow on trees! If you don't need it, please don't print it!

If you require more recycling bins or have any questions please contact the Energy and Environmental Management Unit
