

School of Cellular and Molecular Medicine Lecture

A microscopic image showing numerous red blood cells (erythrocytes) in a field of view. The cells are biconcave discs, appearing as reddish-brown rings with lighter centers. They are densely packed, with some in sharp focus and others blurred in the background.

Cell regeneration: the foundations of the body

Wednesday 18 February 2014 7.30 pm to 9 pm

This conference is an opportunity to share and discuss breakthroughs that have taken place in stem cell research and tissue engineering. What are the possibilities? Join academics from the University of Bristol's School of Cellular and Molecular Medicine to join in the discussion.

Speaker: Professor Anthony Nother

Venue: Reception Room, Wills Memorial Building, Queen's Road, BS8 1RJ

Free entry, but booking is required
