Donations from trusts, foundations and companies can help the University of Bristol leverage even more support from research councils and government bodies. The support we have received from these donors works to drive forward our research. In some cases, the partnerships we form help us to provide our students with the skills, experience and expertise needed to ensure they are some of the most sought-after graduates. In 2015/16, the trusts, foundations and companies who donated to the University of Bristol, gave a generous £3.9 million in philanthropic support.
