Community Based Dental Teaching Conference

Friday 8th April 2011 Leigh Court Bristol

Louise Nash
• Educational training in teaching for all chairside teachers, especially part-time general dental practitioners
J. Sweet, J. Wilson and L. Pugsley
Outreach Teaching

What's it all about?
Bridging the Gap
Bridges

- University
- Dentists
- Community

- Foundation training
- DCPs
- Oral health
Key Points

• Contact with the real world
• More clinical procedures
• Working in a team
• Better understanding of oral health care delivery
QA for VT

QA for Outreach?
Team work
QA

• Patient safety
• Delivery of Curriculum
• Assessment
Patient safety

Policies
- Patient centred dentistry
- Protocol for practice standards CQC/HTM0105
- Documentation
- Safety management structure
- RPA
- Induction

Monitoring & Evidence
- Practice inspections
- Selected trainers
- Risk assessment
- Trained staff
- Intelligent referral
- H & S training
- COSHH/RIDDOR
- CPR training
Delivery of Curriculum

Policies
- A policy for education
- Course content & design
- Appropriate evaluation of teaching
- Should always be in development

Monitoring & Evidence
- GDC guidelines
- Peer review
- COPDEND guidelines
- Competencies
- Reflective frameworks
- Portfolio
Assessment

Policies

• Educational development
• Clinical competence
• Personal progress

Monitoring & evidence

• Experience/confidence checklist
• Needs analysis
• Portfolio/PDP
• Key Skills
• Formative /Summative
• Peer review
• Reflective writing
• Evaluation
• Competencies
Community Based Teaching

The Outreach development is proceeding and the Community Hospital in South Bristol is due for completion in 2012 with clinical activity from September in that year. The staff associated with this teaching have been appointed.
Aims

• Improve oral health
• Promote high quality dental care
• Establish an ethos of lifelong learning, integrity and accountability
• Better educational outcomes
Objectives

• Improving the undergraduates exposure and experience with patients
• Prepare students to take their place in the community
• Support the training of Dental Care professionals, with emphasis on the dental team.
• Produce dentists who are patient-focused, good communicators, empathetic and able to work well in teams
Strengths

- Contribution and commitment of practitioners
- Value in teaching and witnessing student learning and development
- Provision of support and advice
- Teamwork
- Real world
- More clinical experience
- Better understanding of oral health care delivery
Weaknesses

- Teaching provided by uncalibrated personnel lacking teaching qualifications
- Sustainable patient base- attendance
- Monitoring & evaluation
- Costs & VFM
Opportunities

- Develop a primary calibration system with an educational input
- Develop a framework for QM via a continuing programme of mentor training, statutory training and peer review/appraisal against recognised standards
- Trouble-shoot and advise on underperformance issues
- Instigate regular meetings for clinical teachers with academic staff to update on key teaching issues and learning outcomes
Threats

• Funding
• Challenge to local providers?
• Access & choice
• Reliability of equipment
• Staffing
• Patient attendance
SWOT Analysis Summary

- Calibration
- QM
- Communicate with GDPs locally
- Involve ALL team members
- Instigate a screening process for pts
- Map to curriculum
Plans

• Education training for all GDPs
• Introduction of an e portfolio
• Engagement with local community
Looking for FREE Dental Treatment?
Can you be flexible with daytime appointments?

Bristol Dental Hospital and the School of Oral & Dental Sciences are offering dental treatment for patients who may require fillings, crowns, or simple root canal work as part of the Hospital’s student dentist training programme. The offer applies to routine dental treatment but not emergency problems.

Interested patients will need to be assessed for their suitability, and if accepted for treatment, must be able to attend daytime appointments. Work will be carried out by student dentists under qualified supervision.

You will be able to register for screening assessment
Monday- Friday 2pm – 4pm

Screening assessment sessions are held at Bristol Dental Hospital

There are no charges for this dental treatment.
