New unit with management focus

We have launched a new unit that will introduce students to management concepts. Called ‘Challenges in Innovation and Enterprise’, the unit will reflect upon the challenges faced by managers and provide real-world examples.

The unit will be available to suitable students on the Social Sciences and Law pathway. It is mapped to Bristol Futures, a University-wide initiative to help students become adaptable, successful graduates.

Visit us in Bristol

On 25 April, the University of Bristol is holding a visit day. We are inviting agents and prospective International Foundation Students to attend. The event will be a chance to:

- find out more about the programme
- take a tour of the buildings and facilities
- meet teaching staff and current students
- ask questions.

If you would like more information about the visit day and how to attend, please email us at celfs-ifp@bristol.ac.uk. You can read more about our facilities and take a virtual tour on our website.

Scholarships available

We believe in supporting top International Foundation Programme students with prestigious scholarships.

In 2018, we will award a Futures Prize to a student on each of our pathways. The three winners will each get a £1,500 fee waiver. To be considered for the award, applicants must accept their offer by 1 July 2018.

We are also running the International Foundation Programme Challenge through the Sqore website. For the chance to win £2,000, applicants will need to take the knowledge challenge, fill out a form and write an essay about the International Foundation Programme. Applications are open until 8am on 1 July 2018.
Meet the academics

Our International Foundation Programme is taught by academics who are experts in their field. Whichever pathway students choose, they will receive tailored tuition to prepare them for a degree of their choice.

Dr Alba Lanau
Introduction to the Social Sciences unit
The programme is a great opportunity to learn more about the British education system and the careers on offer. It is also a great place to meet people from all over the world.

Dr Dawn Davies
Foundations in Biomedical Sciences Unit
You will be introduced to new skills and cutting-edge scientific research, all delivered by incredibly skilled, research-active academics.

Dr Jonathan Charmant
Foundations of Chemistry unit
Our laboratories are some of the best in the world for chemistry. You will start to get access to academics who are right at the top of their game.

Louise Hatherall
British Constitutional History unit
International Foundation Programme students learn a lot of skills that undergraduate students will have to pick up in the first couple of months.

Ken Delaney-Moore
Foundations of Finance and Economics unit
I would definitely, unreservedly recommend Bristol’s International Foundation Programme. There is no doubt the students are very well cared for and catered for.
