Final MBChB Clinical Assessments

CLINICAL COMPETENCY ASSESSMENTS (CCA’S)

ASSESSOR GUIDANCE AND TRAINING
Aims and Objectives

• Aim
  ○ To familiarise academy examiners with the principles and practical aspects of delivering clinical assessments within year 5
Objectives

Following revision of this material you should know

- The specific components of the scheme of clinical assessments for year 5 students
- The timeframe for undertaking these assessments within Senior Medicine and Surgery and PPP
- How to administer each assessment
- The principles of grading students’ competence during the assessments
Outline of content

- Background
- What the assessments look like
- How to administer them
- Video material of example assessments
Aims of assessment in year 5

To:

- Ensure students have the necessary knowledge, skills, attitudes and behaviours to become a foundation doctor

- Prepare students for the assessments they will meet in their foundation programme

- Maintain the ability of our students, as noted by external examiners, to integrate a history and full examination and synthesize a diagnosis and initial management plan based upon their findings
We want to test here

A simple model of competence

- Does
- Shows how
- Knows how
- Knows

Summary of previous changes (2017-18)

- Reliability of CCA series in 2016-17 was not sufficient to justify their continued use as summative assessment – now formative, although still must do, and count as core evidence towards Entrustable Professional Activities (EPA’s) which all need sign off in Year 5 workbook by end of PPP

- Given now formative, each CCA scored as either
  - Performs at level expected
  - Not yet performing at level expected
    - No stipulation as to number of domains that mandates particular global judgement
    - Assessors need to indicate which EPA the CBD or Mini-CEX maps to (OLC CCA all map to one EPA)

- Students can start to complete CCA’s (Mini-CEX and CBD) when they feel ready in SMS
  - Expected that students undertake a **minimum** of 1 Mini-CEX and 1 CBD during Senior Medicine and Surgery

- OLC-CCA arranged by academy
  - Weeks 6-11 SMS
  - Weeks 1-6 PPP

- Relaxed criteria for assessor eligibility

- **BIG LOGISTICAL CHANGE – ELECTRONIC MARKING – MUST READ THIS**
  - [UMEP CCA for Assessors 17-18.pdf](#)
By the end of PPP students will need to have 8 CCA’s at “performs at level expected”

- **2 Objective long cases (OLC-CCA)**, 1 in SMS and 1 in PPP
- **3 Mini-CEXs** - at least 1 in SMS, at least 1 in GP during PPP
- **3 CBDs** - at least 1 in SMS.
  - One of the CBDs should have a focus on a patient with Palliative Care and/or Oncology needs.
When will they do them?

OLC-CCA’s will still be arranged by academy for each students during fixed (but wider) times

- OLC-CCA 1  Weeks 6-11  Unit 1
- OLC-CCA 2  Weeks 1-6  Unit 2

Students will be able to complete all other CCA’s from commencing SMS - with some limits:

  Expectation that at least 1 CBD and 1 Mini-CEX is completed within SMS

All must be complete by end of PPP
Logistics

- CBD’s and Mini-CEX to be completed online
  - Looks like an app but in reality you’re accessing the student’s e-portfolio (UMeP)

- Students should try to identify potential CCA opportunities at the appropriate time in the unit and agree their undertaking with assessors from within the clinical teams they are working with

- Ability to organize this will reflect their developing professionalism.

- OLC CCA’s – still on paper but assessors need to enter the date, time and global verdict on UMeP at the end of the assessment
Who can assess?

- All assessments - single assessor
- Assessors for OLC-CCAs
  - GMC registered doctors who have completed any relevant postgraduate membership / fellowship examination and who have reviewed the CCA assessor guidance material.
- Assessors for all other CCAs (Mini-CEX and CBD)
  - GMC registered doctors who are CT1 level or above (including Clinical Teaching Fellows) who have reviewed the CCA assessor guidance material
    - or
  - specialist nurses who are involved in regular completion of Supervised Learning Events / Workplace Based Assessments for foundation / speciality trainee doctors and who have read the CCA assessor guidance material.

Marking CCA’s

- **Electronic marking**
  - Through linking to student’s e-portfolio
  - All CBD’s / Mini-CEX’s
  - OLC-CCA – mark on paper, return to academy but record global judgement on UMEP
  - MUST READ THIS - [UMEP CCA for Assessors 17-18.pdf](#)
  - Back up paper marksheets for CBD/Mini-CEX available through blackboard/ academy

- **Rating scales for various domains to be completed**

- **Patient scoring (and written feedback) for OLC-CCA and Mini-CEX**

- **Global rating determines overall competence**

- **Formative components as per post graduate SLE**

- **Link CCA to no more than two EPA’s in year 5 workbook**
  - From Management of Marks 2018-19
  - Each CCA should generally provide evidence towards one EPA but may count towards an additional EPA if the assessor feels performance and detail of discussion justifies it. A CCA may not count towards more than 2 EPAs.
Linking CCA’s to EPA’s – additional point

- Please link CCA to **no more than two EPA’s** in year 5 workbook

  - From Management of Marks 2018-19:
    - Each CCA should generally provide evidence towards one EPA but may count towards an additional EPA if the assessor feels performance and detail of discussion justifies it. A CCA may not count towards more than 2 EPAs.
Common definitions of standard expected for all CCA’s / grading of competence

- **Performs at level expected**
  - indicates the student is procedurally competent and safe, and has demonstrated at least the *minimal* level of competence required for *commencement* of FY1.

- **Not yet performing at level expected**
  - means that you do not feel student has reached a standard that will allow him or her to function as an FY1, in particular if you feel they have demonstrated behavior that could potentially compromise patient safety.
Running the OLC-CCA

- Student has 1 hour to complete **and document** complete history and examination
- 1 Examiner
- Students have a further 10 minutes to complete their written record of the case as if it were to be included in the patient’s medical record
- Use this time to clarify signs with pt and collect patient feedback
Running the OLC-CCA Assessment

- Ask the candidate to present a summary of the case and to outline their diagnosis +/- differential.

- Examiners may find it valuable to ask candidates to consider their diagnostic thinking from the history separately before discussing examination findings.
  - In all cases though the candidates rationale for their diagnostic reasoning must be probed, e.g. did they find signs on examination that were expected / unexpected, if so why?

- Ask the candidate what their initial investigation and management plan would be were they the F1 either admitting the patient or responsible for immediate management on the ward.
  - Framing of this part will depend on how long pt has been in hospital
    - May discuss acute admission management / ongoing care / discharge planning
Running the OLC-CCA Assessment

- Patient feedback

**Patient Opinion**

<table>

**Patient Opinion**

"Would you be comfortable with this student looking after you if they were a recently qualified doctor?"

Not comfortable Yes I would

**GLOBAL OPINION OF CLINICAL COMPETENCE**

Consider overall judgement, synthesis, effectiveness and efficiency
OLC-CCA Marksheet

- OLC CCA Marksheet 2017.pdf

- Record global judgement on students e-portfolio through UMeP access
Running the CBD - 1

- Structured discussion of a clinical case either clerked or reviewed by the student during SMS or PPP.
  - Its strength is investigation of, and feedback on, clinical reasoning

- The student should select two patients seen during SMS / PPP where either the students clerking and/or documentation of review is included in the medical notes.

- Students should bring either the anonymised clerking or anonymised copies of their case note entries to the assessment. Students should bring two cases and the assessor will select one for use in the CBD. Alternatively if the assessment is being carried out in an appropriate location in the ward area, the clinical notes can be used where appropriate. The discussion must start from and be centred on the students’ own record in the notes.

- One CBD must involve a patient whose primary problem is related to oncology or palliative care needs. This must be confirmed by the examiner on the appropriate CBD marksheet
Running the CBD - 2

- Cases for a CBD selected by the student must allow demonstration, discussion of the following areas:
  - Medical record keeping
  - Clinical assessment
  - Investigation planning
  - Management planning
  - Professionalism

- It is therefore not appropriate for students to select cases that they have simply recorded in the medical notes but where they were not leading the encounter (e.g. ward round entries for other doctors).

- A CBD should take approximately 15-20 minutes including time for feedback.
## CBD Marksheet

<table>
<thead>
<tr>
<th>DOMAIN</th>
<th>NOT YET PERFORMING AT LEVEL EXPECTED</th>
<th>PERFORMS AT LEVEL EXPECTED</th>
<th>COMMENTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Medical record Keeping</td>
<td>Legible; signed; dated; appropriate to the problem; understandable in relation to and in sequence with other entries; helps the next clinician give effective and appropriate care.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Clinical Assessment</td>
<td>Understood the patient’s story; made appropriate clinical assessment based history and examination findings</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Investigation planning</td>
<td>Discusses the rationale for the investigations and necessary referrals; understands why diagnostic studies were ordered or performed, including the risks and benefits in relation to the differential diagnosis.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Management planning</td>
<td>Discusses the rationale for the treatment, including the risks and benefits.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Professionalism</td>
<td>Discusses how the care of this patient, as recorded, demonstrated respect, compassion, empathy and established trust; discusses how the patient’s needs for comfort, respect, confidentiality were addressed; has insight into own limitations.</td>

<tr>
<td>EPA 4: Recommend and interpret common diagnostic and screening tests</td>
<td></td>
</tr>
<tr>
<td>Other EPA – give number (from Yr 5 Workbook)</td>
<td></td>
</tr>
</tbody>
</table>
CBD – Palliative care / oncology

- One CBD should involve a patient whose primary problem is related to oncology or palliative care needs. This must be confirmed by the examiner on the appropriate CBD marking.
- Examiner does NOT need to be specifically a palliative care physician / oncologist.

ASSESSOR STATEMENT – MANDATORY

I confirm I have reviewed the university of Bristol CCA assessor guidance material

Signature __________________________

I confirm that the PRIMARY PROBLEM of the patient forming the basis of this CBD was oncological or palliative care need

Signature __________________________
## Year 5 Workbook linkage for this CBD:

</tbody>
</table>
A mini-CEX is an assessment of direct observation of a student/patient clinical encounter.

Mini CEX’s must comprise clinical encounters that will be routinely performed by an FY doctor. They must comprise a degree of information gathering as well as communication of clinical information. They may, but are not absolutely required to, include aspects of clinical examination.

Mini-CEX should not be completed after a ward round presentation or when the doctor/patient interaction was not observed but be planned with agreement between student and assessor.

Acceptable encounters could include:
- Clinical patient review e.g. on ward round, in GP surgery or out-patient clinic, at request of nursing staff.
- Explanation of diagnostic test results
- Explanation of an investigation and / or management plan (e.g. complex treatment regime)
- Focused assessment of an existing ward patient known to assessor but not to the student.
Cases for a mini-CEX must allow demonstration of competence in the following areas:
- History taking/information gathering (from patient)
- Communication skills
- Professionalism
- Diagnosis and/or management planning
- Organisation and efficiency

The complexity of cases will vary and assessors must take account of this but encounters that do not allow for clear demonstration of competence in these areas will not be valid.

Review of patients the assessor anticipates to be completely stable and not requiring any management change (e.g. the “medically fit patient” awaiting discharge planning) would not be appropriate.

A Mini-CEX should take not less than 10 and not more than 20 minutes for the student to complete with the patient. Students should be told when 15 minutes have passed. Detailed written feedback must be provided as detailed on the marking scheme.
Assessors need to give clear instruction to the student as to what is expected within the assessment

- “Mrs X was recently admitted with breathlessness – please take a history in relation to her presentation and perform a relevant examination”.
- Alternatively students may be directed towards focusing on key aspects of the history alone to allow questioning around diagnostic reasoning and management.

Students must not try to take a full history as they would in a long case but focus on the presenting complaint and any other relevant points from e.g. PMH/drug history.

Similarly examination should be focussed but relevant and appropriate. Students would not, for example, be required to measure blood pressure, but note relevant findings from observation charts.
### Patient feedback

- As per OLC-CCA

#### Patient Opinion

</tbody>
</table>
Crucial elements
- Inappropriate attitudes or behaviour
- A lack of awareness of his/her limitations
- A level of knowledge that could put patients at risk

OLC behavioural descriptors provided for Mini-CEX

Key anchor statements
- Performs at level expected indicates the student is procedurally competent and safe, and has demonstrated at least the minimal level of competence required for commencement of FY1.
- Not yet performing at level expected means that you do not feel student has reached a standard that will allow him or her to function as an FY1, in particular if you feel they have demonstrated behavior that could potentially compromise patient safety.
If you don’t think they have performed adequately please grade accordingly

Students have plenty opportunity to repeat each CCA

If student is not performing at level expected, during feedback suggest how long they should wait before attempting further assessment, depending on where they need to focus further study efforts
After the assessment

- Students should be told their mark alongside detailed feedback
- CBD/Mini-CEX results direct onto UMeP
- OLC-CCA global outcome onto app, marksheets returned to academy administrator
- Copies of the marksheets including assessor and patient feedback should be retained by the student in to guide further learning.
- Examiner notes taken during the assessment (primarily from OLC-CCA) should not be returned to the student
Paper copies of CCA’s
