

Student First Name	Student Surname	Degree Title	1st Supervisor	2nd Supervisor
Alex	Nicholson	Hand hygiene in primary schools	Rona Campbell	Sara Brookes
Abigail	Lyndon	Oppiod addiction:risks from concurrent poly-substance abuse	Matthew Hickman	Graeme Henderson
Alexander	Stiby	Causal Inference in Observational Studies of Substance Abuse	John Macleod	Matthew Hickman
Alexander	McKeown	The use of synthetic biology and bio-engineering for enhancement and in medicine	Ruud ter Meulen	Helen Lambert
Alison	Gregory	The shared burden of domestic violence - exploring the physical, emotional and psychological implications for adult family members and friends of women experiencing domestic violence.	Gene Feder	Emma Williamson
Anna	Pease	Factors influencing infant care practices in the sleep environment amongst families at high risk of SIDS	Peter Blair	Peter Flemming
Andrew	Crawford	Genetic predictors of adverse effects of antidepressants	Glyn Lewis	Sarah Lewis
Antri	Giannakou	Predicting the progression of cognitive inpairment in memory clinic attendees	Chris Metcalfe	
Babita	Rajkumari	HIV Infection and widowhood in India	Helen Lambert	
Barry	Main	Development and piloting of a complex intervention to improve information exchange for patients undergoing major head and neck surgery.	Jane Blazeby	Jenny Donovan
Behnaz	Schofield	The ethical and societal implications of not obtaining informed consent for epidemiological studies	Ruud Ter Meulen	Richard Huxtable
Ben	Watson	Neurobiological Mechanisms underlying the motivational process in chronic opiate and alcohol dependance	Sue Wilson	Anne Lingford Hughes
Blanca	Bolea	Neurosteroid levels in adults with ADHD and its correlation with symptoms and effectiveness of medication	Alan Emond (formerly David	Glyn Lewis (formerly Alan Emond)
Caroline	Boulind	Epidural versus Wound Infusion Catheter following Laparoscopic Colorectal Surgery within an Enhance Recovery Programme	Jane Blazeby	Chris Metcalfe
Charlotte	Chamberlain	How will the 2010 reorganisation influence the effectiveness of commissioning for cancer care: evaluating changes in the speed of access, equity and cost -effectiveness of prescribing for patients with cancer	Will Hollingworth	Amanda Owen Smith
Claire	McKenzie	The emotional effects of diabetes	Alan Montgomery	David Kessler
Colin	Steer	PhD by publication	George Davey Smith	

Daniel James	Ford	An Observational Study of the Epidemiology, Natural History and Management of Patients with Advanced Chronic Kidney Disease	Yoav Ben-Shlomo	Charlie Tomson
Denis	Baird	Populations, pathways and molecules: mathematical and statistical approaches	Ian Day	Moin Saleem
Denise	Remy	The impact of recent French government policy, particularly the introduction of commercial practices, on the ethical values in veterinary practice in France.	Ruud ter Meulen	Anne Haase
Duleeka	Knipe	Life course influences on suicidal behaviour in low and middle income (LAMIC) countries: a cohort study based on 48,000 households in Sri Lanka	David Gunnell	Chris Metcalfe
Emily	Nicoli	Coinfection between Influenza and Invasive Pneumococcal Disease	Caroline Trotter	Caroline Colijn
Emily	Henderson	A randomised control trial of revastigmine versus placebo for improving gait stability in patients with Parkinson's disease with a past history of a fall.	Yoav Ben-Shlomo	Dr Alan Whone
Emma	Anderson	Prevalence and determinants of nonalcoholic fatty liver disease (NAFLD) in adolescence	Debbie Lawlor	Abigail Fraser
Galit	Geulayov	The impact of parental self harm on offspring's self harm, mental health and educational performance	David Gunnell	Chris Metcalfe
Gemma	Morgan	Physical activity facilitation to improve functional ability and independent living in older people at risk of disability: a feasibility study and pilot randomised controlled trial	Rona Campbell	Yoav Ben-Shlomo
Gemma	Lasseter	Exploring the feasibility of a universal consent model in general practice	Chris Salisbury	Richard Huxtable
Georgina	Bentley	Screen viewing behaviour in preschool aged children and its influence on physical activity and sedentary lifestyles	Katrina Turner	Russ Jago
Ghazaleh	Fatemifar	Fine mapping of the association between osterix genotypes and BMD in children	Jon Tobias	Dave Evans
Giles	Birchley	Is the 'Best Interest' approach a valid and workable way to make decisions on behalf of critically ill children? Who should decide about these interests and how should they do so?	Richard Huxtable	Zuzanna Deans
Hannah	Sallis	The detection of genetic variants reliably associated with depression. Additionally the investigation of observational associations between depression and modifiable risk factors.	Dave Evans	Jonathan Evans
Hannah	Thornton	Vaccines & Antibiotics as Predictors of Antimicrobial Resistance	Alastair Hay	Peter Blair
Harriet	Fisher	Exploring the impact of universal health promotion policies on young people from different socio-economic and ethnic groups.	Caroline Trotter	Suzanne Audrey
Hashem Ali	Shihab	Genomic Aspects of Common Disease Genetic Effect	Tom Gaunt	Julian Gough
Heather	Brant	Psychosocial and ethical aspects of appearance associated with general conditions	Ainsley Newson	Diana Harcourt

Iryna	Culpin	Pubertal timing and depressive symptoms in adolescent girls: the roles of family and peer relationships	Dr Carol Joinson	Professor Ricardo Araya
Jie	Zheng	Gene-centric association study for Cholesterol Gallstone Disease using the HumanCVD BeadChip (Illumina)	Ian Day	Tom Gaunt
Jo	Crichton	Peer-led intervention to promote chlamydia testing	Rona Campbell	Matthew Hickman
Jocelyn	Cherry	Visual and hearing impairments and unintentional injury in children	Cathy Williams	Amanda Hall
John	Busby	To investigate the magnitude, causes and consequences of variation in unplanned hospital admissions across Primary Care Trusts in England	Will Hollingworth	Sarah Purdy
John Peter	Kemp	Australian Genome-wide Association Study of Osteoporosis	David Evans	Jon Tobias
Julia	Sarginson	Differentiating between the inflammatory response and sepsis in small paediatric burns	Alan Emond	Amber Young
Kaitlin	Wade	The use of Genome-wide and experimental investigation to explore and dissect potentially causal pathways to common disease	George Davey Smith	Nic Timpson
Karen	Coulman	The patient perspective of living with surgery for morbid obesity: Creating a patient 'core' outcome set, and investigating ways to improve follow-up care	Jane Blazeby	Amanda Owen Smith
Kerry	Gutridge	Assisted self-harm in mental health care facilities: an ethically acceptable approach	Richard Huxtable	Jonathan Evans
Kimberley	Burrows	Immuno - PCR developments for cohort based biomarker studies	Ian Day	Santi Rodriguez
Kyla	Thomas	The association of prescribed drugs with psychiatric adverse drug reactions (ADRs) such as depression, non-fatal self harm and suicide: An epidemiological analysis using data from the Medicines and	David Gunnell	Richard Martin
Kyle	Macdonald-Wallis	The influence of social networks on physical activity in 10-11 year old children	Russell Jago	Jonathan Sterne
Lea	Trela-Larsen	Including genotype in population models of human behaviour in relation to cigarette smoking and alcohol consumption	Ian Day	Prof McNamara
Leah	Bowen	The impact of Cardiac Rehabilitation on quality of life if post-surgical patients	Sarah Purdy	Ali Heawood
Lee	Harrison	Clinical and therapeutic aspects of sleep disturbance in chronic pain	Andrea Malizia	Sue Wilson
Lindsey	Sinclair	Molecular and life course aspects of APOE and TOMM40 in cognition	Ian Day	Seth Love
Louise	Millard	Data Mining of Global Happiness: A Machine Learning Approach	George Davey Smith	Peter Flach

Lydia	French	Risk Factors, prevalence, co-occurrence and course of PND and PTSD in women following ART	Debbie Sharp	Katrina Turner
Lynsey	Webb	Management and survival of failed renal transplant recipients	Yoav Ben-Shlomo	Charlie Tomson
Mairead	Murphy	Developing a generic outcome measure for primary care	Chris Salisbury	Sandra Hollinghurst
Mari-Rose	Kennedy	Ethical aspects of epidemiological research on young people involving linkage to routine individual data	Ainsley Newson	John Macleod
Mary	Ward	Expression Genetics-Genome wide association analysis of gene expression data in the ALSPAC cohort	Tom Gaunt	Dave Evans
Mel	Chalder	Exercise as treatment for depression	Glyn Lewis	Nicola Wiles
Mesut	Erzurumluoglu	Population based study of Consanguinity: Genetic and Computational approaches	Santi Rodriguez	Tom Gaunt
Michelle	Taylor	Role of Genes Involved in Synaptic Plasticity in Schizophrenia	Matthew Hickman	Glyn Lewis
Oliver	Hemmings	Quantitative imaging of phosphoinositide-regulated membrane trafficking in health and disease	Pete Cullen	Margaret May
Osama Ahmad Ali	Al Ghamdi	Genotype Influences on Reference Ranges of Clinical Analytes	Santi Rodriguez	Ian Day
Patricia	Guyot	Expected survival time as a summary statistic in evidence synthesis and economic analysis	Nicky Welton	Tony Ades
Poornima	Prabhakaran	Association between parental height and cardiometabolic risk profile in the offspring - A transgenerational study in a birth cohort	George Davey Smith	Yoav Ben-Shlomo
Rebecca	Richmond	A Lifecourse Approach to studying the interaction between genetic and environmental influences of health and disease within the context of fatty acid profiles	George Davey Smith	Tom Gaunt
Retha	Steenkamp	Multiple imputation of missing data and prognostic survival modelling in patients starting renal replacement therapy.	Margaret May	Paul Roderick
Rita	Patel	Socioeconomic position and health in children in Belarus	Richard Martin	Debbie Lawlor
Robert	Carroll	Identifying the elements of effective hospital management of self harm:Instrumental variable and meta-regression approaches	David Gunnell	Chris Metcalfe
Robert	Whistance	Development of core outcome sets for informed consent and clinical trials of colorectal cancer surgery.	Jane Blazeby	Sara Brookes
Roberto	Melotti	Patterns of parent-child alcohol use in the ALSPAC cohort	Glyn Lewis	Jon Heron

Sally	Stapley	Optimising diagnosis of symptomatic cancer	Willie Hamilton	Tim Peters
Sam	Leonard	How do parents make difficult decisions in pregnancy? A qualitative and ethical exploration in light of advances in fetal anomaly detection	Dr Ainsley Newson	Dr Sarah Payne
Sarah	Gunn	Physical activity and emotional well being in young people	Rona Campbell	David Gunnell
Sean	Strong	Understanding the recruitment process of randomised controlled trials to maximise participation	Jane Blazeby	Sangeetha Paramasivan
Suzanne	Gage	Examining the relationship between cannabis use, psychosis and depression in ALSPAC.	Stanley Zammit	Matthew Hickman
Tamuno	Alfred	Genetic studies of ageing - with a focus on those potentially informative about modifiable factors.	Ian Day	Yoav Ben-Shlomo
Tanya	Trayers	Physical function and primary care service use in contemporary older individuals	Tim Peters	Debbie Lawlor
Teri-Louise	Davies	Genetic Epidemiological and Population Genetics Studies of Human Ageing	Yoav Ben-Shlomo	Mark Beaumont
Thomas	Richardson	The Development of Novel Techniques for analysing GWAS data	Tom Gaunt	Oam Campbell
Tom	Irving	Using mathematical modelling to develop the optimal vaccination strategy against strain A Neisseria Meningitidis in the African Meningitis belt, working with the African Meningococcal Carriage Consortium	Caroline Trotter	Konstantin Blyuss
Tom	Allport	Functional ability following amputation after meningococcal septicaemia in childhood.	Alan Emond	Nicola Rumsey (UWE)
Vanessa	Er	Establishing the evidence base for prevention of prostate cancer progression: nutritional and lifestyle changes after a prostate cancer diagnosis and relationship to surrogate endpoints	Athene Lane	Mona Jeffreys
Vanessa	Tan	The Role of Inflammation and MicroRNA on Fascin Expression in Prostate Cancer	Jo Adams	Richard Martin
