## Application deadline

Application deadlines can be found on the individual programme page within the University course finder.

## Admissions criteria

### Academic requirements

Applicants must hold/achieve a minimum of:

- A first degree in physics or a related subject, normally at a level equivalent to at least UK upper second-class honours, or a relevant postgraduate master’s qualification.

For information on international equivalent qualifications, please refer to our International Office website.

### English language requirements

Profile F

All applicants are required to have reached the required profile level of English language as specified by the University's English Language Requirements Policy prior to registration on to this programme.

### Non-standard applications

We welcome applications from those with non-standard qualifications who can demonstrate knowledge, experience and skills developed in the workplace, or elsewhere, relevant to the programme of study. Please use your personal statement to provide further details. Non-standard applications will be considered by the Admissions Tutor(s) for the programme on a case by case basis.
Application process

Online application form

Applicants should complete the online application form, uploading all required documents directly. Further information is available on our guidance for online applications page.

Applications will not be considered until all required documents have been uploaded. If you have already submitted an application, you can upload additional documents into the ‘Post-submission uploads’ section of the application form. Paper documents received by post, or electronic documents received by email, are only considered in exceptional circumstances.

Required and optional documents

✓ **Two academic references (minimum):**

References should be submitted electronically by the referee, using the online reference form. Alternatively, scanned copies of the original reference document(s) can be uploaded by the applicant. If you graduated more than two years ago, or if professional experience is relevant to the application, professional references will be accepted in lieu of one academic reference. At least one referee should be familiar with the applicant’s academic work. References supplied with a personal contact email address will be accepted in exceptional circumstances, which must be explained within the reference. All references must be written, signed and dated on official letter headed paper from the referee’s organisation. They must include the referee’s full contact details, i.e. postal address, telephone number and organisation email address and must be dated within the last two years. A reference template is available to show the required format.

✓ **Degree certificate(s):**

From first and subsequent degrees. We require colour scans of original documents and certified translations of documents issued in any language other than English.

✓ **Academic transcripts:**

From first and subsequent degrees. We require colour scans of original documents and certified translations of documents issued in any language other than English.

Transcripts must list all subjects taken and grades achieved to date, with the grade scale clearly displayed in the transcript. Applicants must clearly state their current average grade in the online application form.

✓ **Personal statement:**

Personal statements should highlight the motivation for applying for the course. Please state why you are particularly qualified for research in this area (reasons could include previous research experience or successful completion of training in relevant techniques). Please also list 1-2 potential supervisors at Bristol, explaining your choice.

✓ **Programme specific personal statement requirements:**

The personal statement should explain why the applicant wishes to continue to postgraduate study, and which area of Physics they are interested to pursue.
All applicants are required to have reached the required profile level of English language as specified by the University’s English Language Requirements Policy.

CVs might include details of other relevant work experience and qualifications to support an application.

Optional Documents

Research Statement: You may submit a research statement if you wish, although research projects are generally agreed in discussion with supervisors rather than proposed by applicants. Example of basic description edit as appropriate - The primary requirement for the research statement is to define and situate your research within an academic/disciplinary context. You should remember that people in the academic community are the primary audience/readership for postgraduate research. This means that you will need to identify:

1. The research questions or problems that you intend to address;
2. The research context for your project/programme of work;
3. The methods you think you will use to pursue the key questions.

Selection process

Assessment of applications

All applicants are considered in line with the University’s Admissions Principles and Procedures Policy and Equality, Diversity and Inclusion policy. Once a complete application has been submitted with all required supporting documents, it is considered by at least two members of staff using the following criteria:

Decisions are made on the basis of all the available information, including the written application and references, and, if applicable, the performance at interview.

Interviews

Interviews form part of the selection process.
The purpose of the interview is to assess whether the applicant has the necessary skills and capabilities to pursue the chosen postgraduate programme, and whether the programme is appropriate to the applicant’s interests and aspirations.

Interviewees based overseas will normally be interviewed by telephone or Skype.

Programme specific Interview requirements
Candidates may be invited to attend an interview. There is no set format for interviews, but they typically cover one or more of the following: the applicant’s academic background, including training and experience that is of particular relevance to the programme or project; the applicant’s motivation for applying, including specific research interests within the discipline and career aspirations; potential research projects; an opportunity for the applicant to ask questions.

Decisions

Applicants will be notified by email when a decision has been made and decision letters will be available to view and print by logging into the application. If there is a deadline by which applicants must accept an offer of admission or pay a deposit, this will be stated in the offer letter.
## Offers
Offers will typically be made in line with the academic requirements set out above. Offers made may be conditional or unconditional. An unconditional offer will be made to applicants who have already met the conditions and provided evidence that conditions have been met. Where academic or language requirements have not yet been fulfilled, applicants will receive a conditional offer outlining the requirements that must be met.

If an applicant is not selected to receive an offer for the course to which they have originally applied, we may offer the opportunity to be considered for an alternative programme in a related subject area. In such cases applicants will receive an email notification providing any alternative course options and asking whether they wish to be considered for these. It may be necessary for applicants to submit additional documentation in order for the application to be fully considered for an alternative programme. Details of the documentation required can be found in the admissions statement for the relevant programme.

## Deferrals
Deferred entry is available for this programme, subject to agreement by the relevant Admissions Team. Please contact physics-pg@bristol.ac.uk to make a formal request.

## Additional information
### Extenuating circumstances
If your education has been significantly disrupted through health or personal problems, disability or specific difficulties within your studies, you can submit an extenuating circumstances form as part of your application.

The information provided will be treated confidentially and will help us to assess your academic performance fairly considering your circumstances.

### Academic Technology Approval Scheme (ATAS)
Applicants who will require a visa to study in the UK will also be required to gain clearance through the Academic Technology Approval Scheme (ATAS). The Academic Technology Approval Scheme is a clearance process which affects overseas applicants (outside the EEA and Switzerland) for certain postgraduate science, technology, medical and engineering studies in the UK. Applicants to affected programmes are required to obtain an ATAS certificate before applying for a visa.

### Visa
International students coming to the UK to study full-time may need to apply for a student visa. Tier 4 student visa guidance notes are available on the University website.

## Fees and Deposits
### Fees
Annual tuition fee for 2020/21 if available on the relevant prospectus entry for this programme.

### Deposits
Deposits are not required for this programme.

### Sponsored Students
Sponsored students will need to upload a copy of their sponsorship letter using the ‘Post Submission Uploads’ section of the online application.
