School of Chemistry

We are delighted to have been able to offer you a place to study in the School of Chemistry.

We hope that you would agree that visiting us and finding out what it’s really like to be a Chemistry student here will help you to make the best possible decision as to whether Chemistry at Bristol is the right choice for you.

This is especially true if you haven’t visited us on one of our open days but even if you have, we’re sure that you’ll find the focussed activity of our offer-holders visit enormously valuable.

After a brief introduction, you’ll have lunch with some of our undergraduate students who were in the same position as you about a year ago. You will then be shown around the School by one of our research leaders. They will show you how your academic journey through university will lead you to a position where you are making new chemistry discoveries in your final year. They’ll also show you how world-leading research and outstanding teaching reinforce each other.

Our Dynamic Laboratory Manual is one aspect of our teaching that you won’t find anywhere else. You’ll be able to explore the DLM in an interactive session that will show you how powerful this tool is for helping you to understand and get to grips with practical chemistry.

We hope that your visit day will help you confirm that Bristol is the right university for you.
**Central programme** | **Time** | **Location** | **Map ref.**
--- | --- | --- | ---
Event registration | 9 am to 5:45 pm | Wills Memorial Building foyer | 26
