# Flow diagram to show options for the progression and completion of students on taught modular programmes

*These flow diagrams are for illustrative purposes only and must be read in conjunction with the relevant regulations that are set out in this Code.*

*The flow diagrams for progression and completion in an undergraduate modular programme represents a typical Honours Bachelors or Integrated Masters programme; they do not therefore reflect programme-specific regulations with regard to must-pass units and conditional progression.*

*Notes:*

- *Students newly registered on accredited programmes in Engineering and Computer Science are subject to different rules on compensation for the purposes of progression or completion of the programme, as set out in section 31 of the Taught Code.*
- *The flow diagram for taught postgraduate programmes represents a typical Masters programme where the taught component is 120 and the dissertation 60 credit points. The flow diagrams do not therefore represent the MRes, MA in Law or MSc in Social Work.*

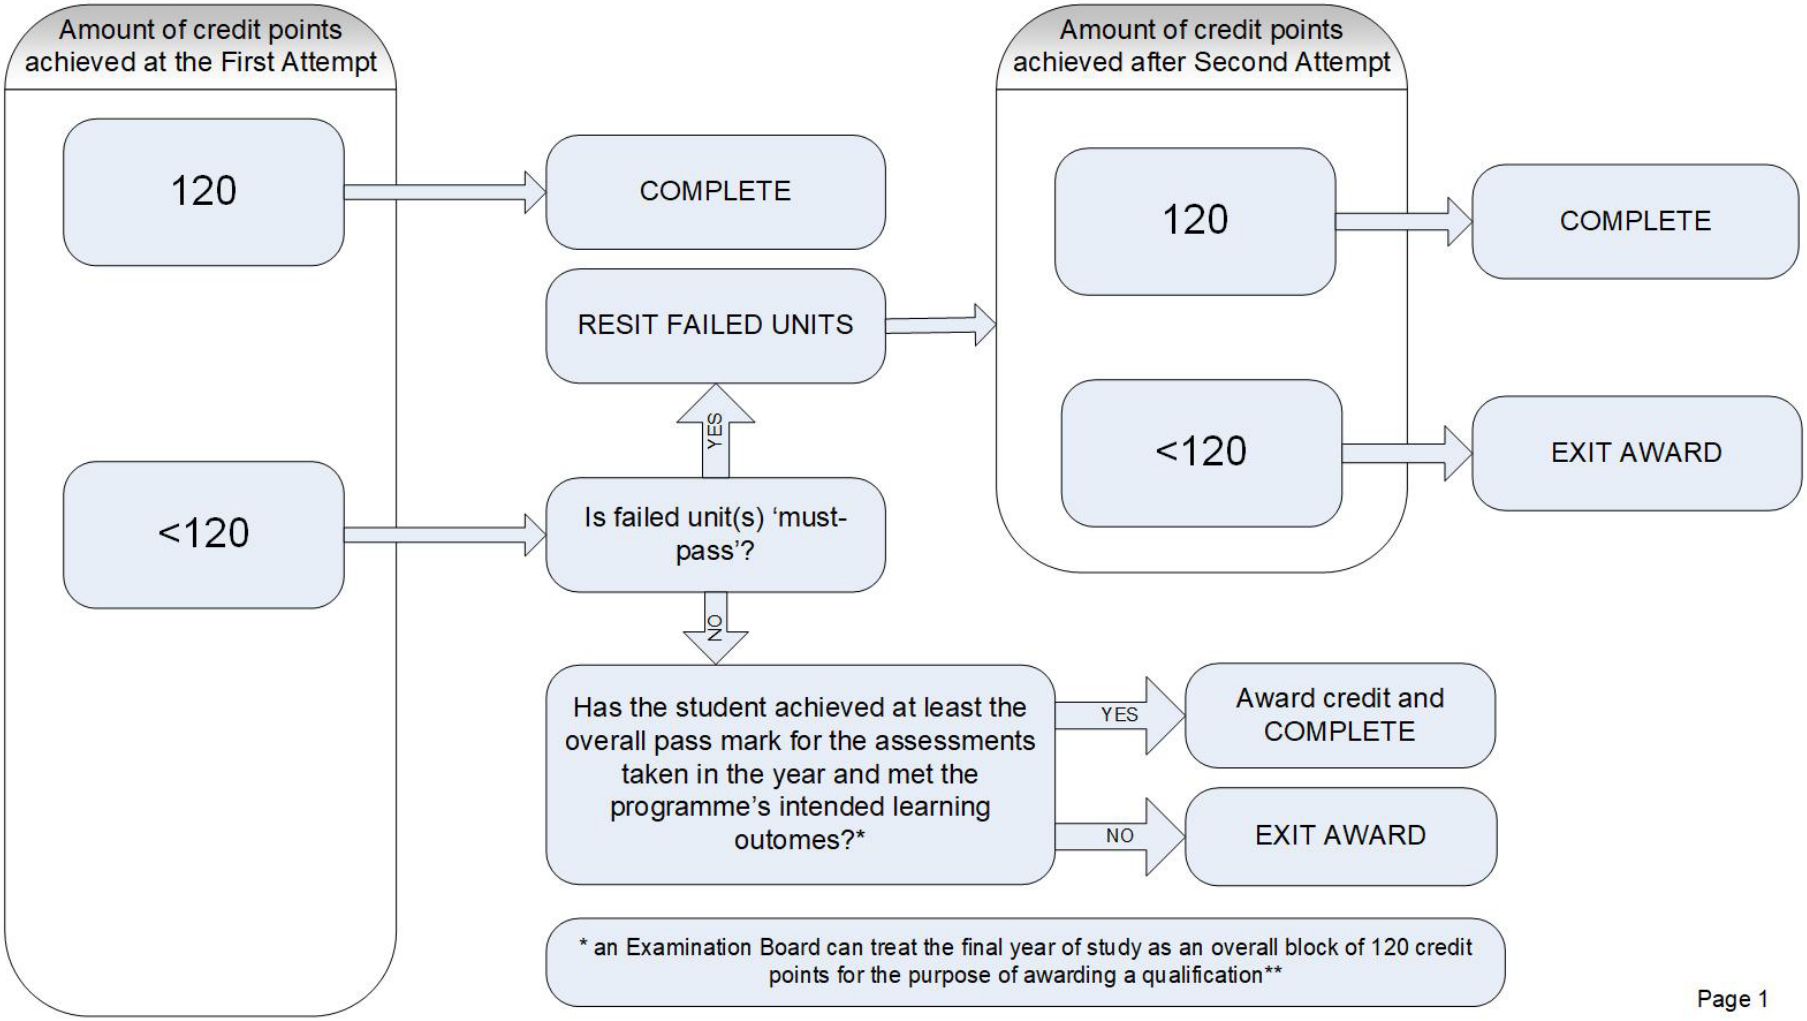
* Due to professional accreditation requirements, compensation is not available to students newly registered on accredited undergraduate programmes in Engineering and Computer Science from 2022/23.

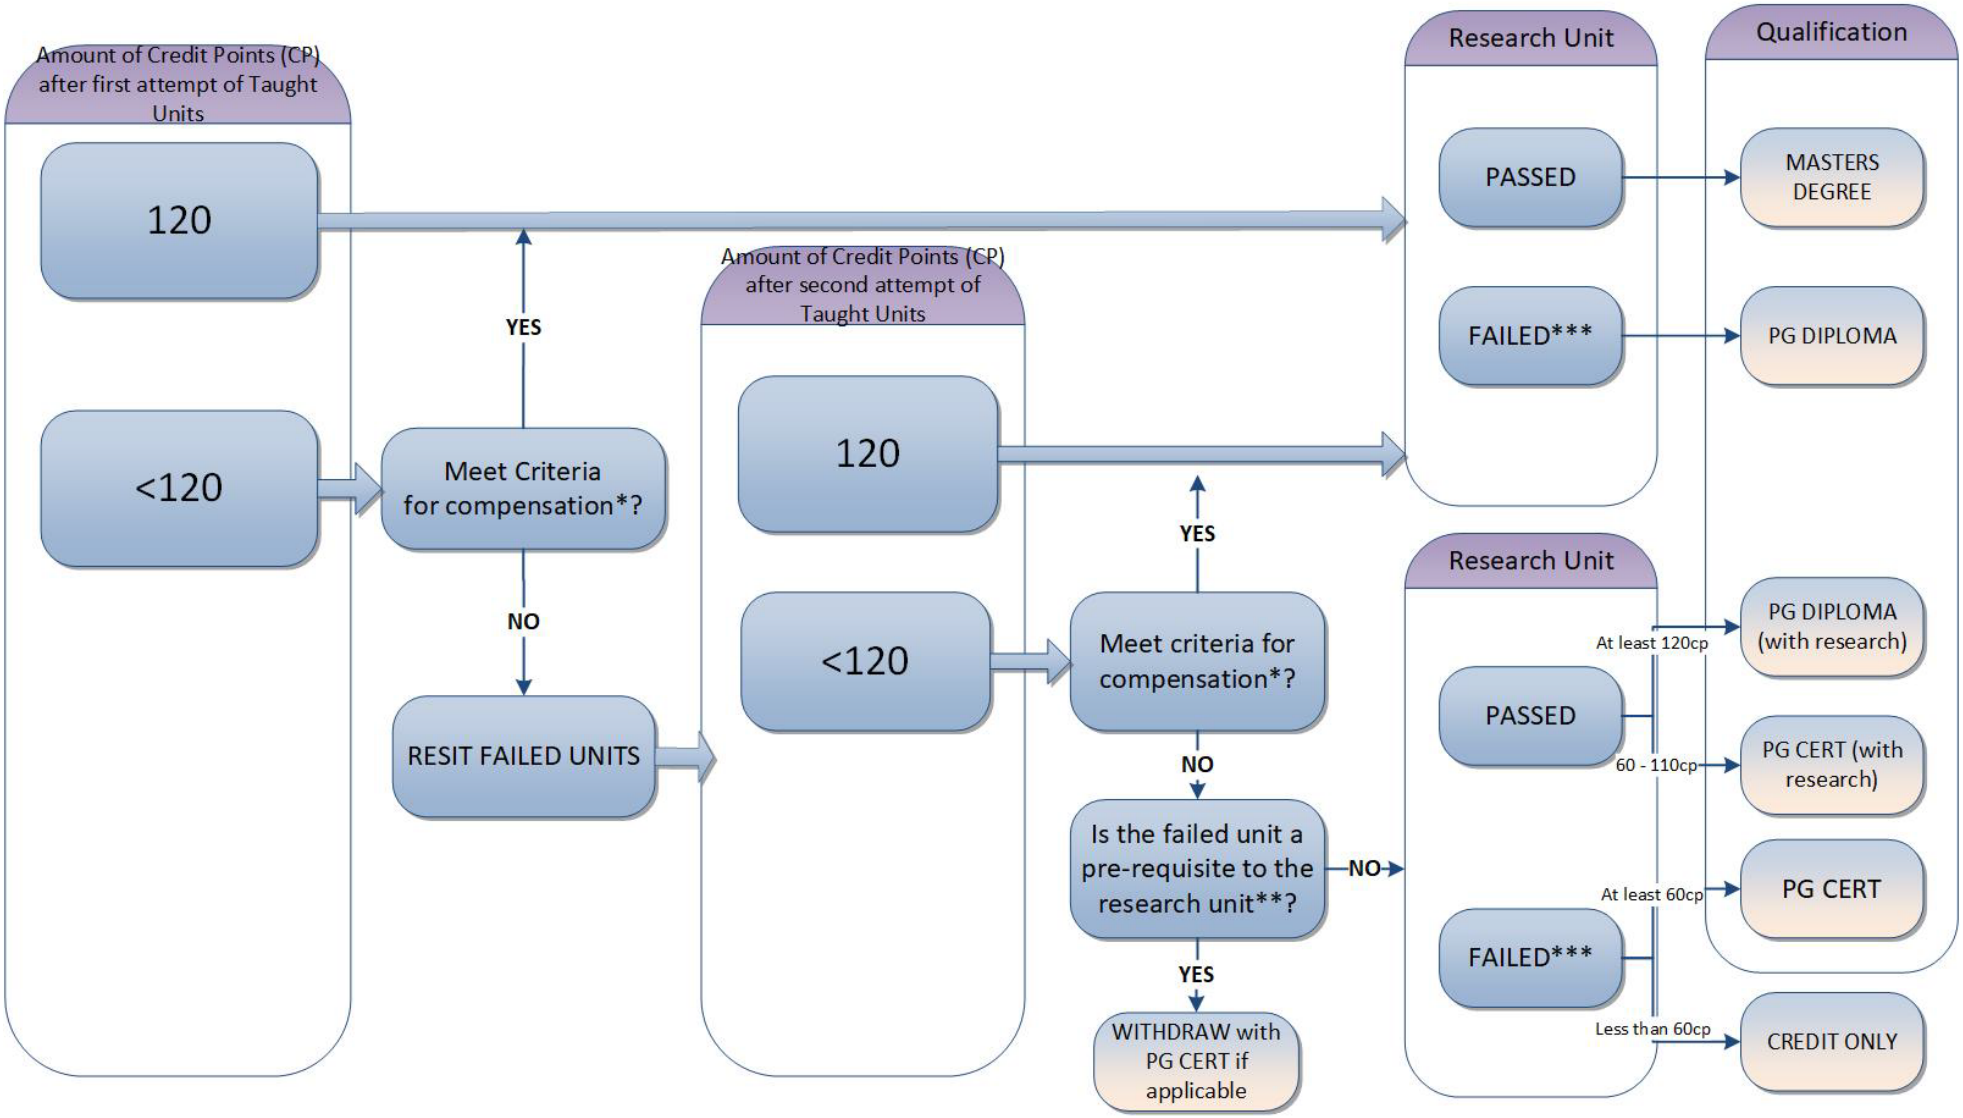
# Flow Diagram for Completion in the Final Year of Study in Undergraduate Modular Programmes



Page 1

** Due to professional accreditation requirements, this regulation is not available to students newly registered on accredited undergraduate programmes in Engineering and Computer Science from 2022/23. The Exam Board will, however, apply a compensated pass to a unit(s) up to 20 credit points provided certain conditions are satisfied.

# Flow Diagram for Taught Postgraduate Programmes



* A programme may apply compensation at either the first or the second attempt.

** Some programme may require a student to pass a taught unit as a condition to entry onto the research unit. This will be stated in the relevant programme specification where applicable.

*** Where a student has achieved a near-pass mark (between 45-49 out of 100) for the research unit, they will be permitted to re-submit the dissertation for a capped mark as a second attempt.
