Wednesday, 8th June

9:30 – 10:00 Arrival and registration, foyer outside LT3

10:00 – 11:00 Keynote: Innes Cuthill (LT3)

11:00 – 12:30 Parallel sessions

	LT3	G77A
11:00	*Andrew Buskell* Cultural Evolvability: Exploring Cumulative Culture	*Yafeng Shan* Exemplarising Mendel's Contribution
11:30	*Jonathan Birch* Cultural Kin Selection and the Deep Structure of Human Cooperation	*Tarquin Holmes* The Domestic-Wild Divide in Historical and Contemporary Practice in the Life Sciences: the Non-Trivial Practical and Epistemic Consequences of Demarcation.
12:00	*Joeri Witteveen* Mutualism, Markets, and the Evolution of Morality	*David Pena-Guzman* A Historical Epistemology of Contemporary Biology: The Scientific Present as History In-The-Making

12:30 – 1:30 Lunch in foyer

1:30 – 2:30 Parallel sessions

	LT3	G77A
1:30	*Flavia Fabris* Beyond Waddington's Epigenetics: Towards a Process Account of Cryptic Genetic Variability	*Andrea Raimondi and Shinya Aoyama* Ontology and Methodology - Understanding Organization and Development in Biological Practices
2:00	*Javier Suárez* Symbiosis Research and Natural Selection: How the Omnipresence of Symbiosis Affects Our Way of Conceptualizing Natural Selection	*Berys Gaut* Is Pretend Play an Adaptation for Enhancing Creativity?

2:30 – 3:30 Keynote: Sabina Leonelli (LT3)

3:30 – 4:00 Coffee in foyer

4:00 – 5:00 Parallel sessions

	LT3	G77A
4:00	*Omri Tal* From Typical Sets to Typical Genotypes	*Joseph Wu* Mechanisms in Cancer
4:30	*Elselijn Kingma* Pregnant Individuals	*Prakhar Manas* Mechanisms, Parts and Mutual Manipulability

5:00 – 6:00 Keynote: Alexander Rosenberg (LT3)

6:00 – Drinks (location TBA)

Thursday, 9th June

9:00 – 10:00 Keynote: Tudor Baetu (LT3)

10:00 – 10:30 Coffee in foyer

10:30 – 12:30 Parallel sessions

	LT3	G77A
10:30	*Ella Whiteley* Reuniting the Biological and the Social: Developmental Systems Theory and Feminism	*Giorgio Airoldi and Cristian Saborido* Does Natural Selection explain phenotypic complexity?
11:00	*Jessica Laimann* Explaining Human Behaviour, Changing Human Behaviour: How to be an Evolutionary Social Constructionist	*Richard Watson* Is optimisation enough for evolutionary adaptation?
11:30	*Edit Talpsepp* The Essentialism Myth and Stereotypes Concerning Human Categories	*Pierrick Bourrat* Questioning the Relevance of the Multilevel Selection 1 / Multilevel Selection 2 Distinction in Evolutionary Transitions in Individuality
12:00	*Riin Kõiv* On Why Genetic Traits Can Be Constitutively Socially Constructed	*Cedric Paternotte and Marc Artiga* Deception: a Functional Account

12:30 – 1:30 Lunch in foyer

1:30 – 3:30 Parallel sessions

	LT3	G77A
1:30	*Anne Sophie Meincke* Systems-bio-agency and the Possibility of Artificial Agents	*Caglar Karaca* Second Order Causation and Randomness in Parallel Evolution
2:00	*Stephan Guttinger* Using Science to do Metaphysics: What We Can Learn from Protein Biology	*Vladimír Vodička* Much Ado About Nothing - The Case of Definition of Life
2:30	*Matthew Baxendale* What's Wrong with the Principle of Sufficient Explanation: The Tissue Organisational Field Theory & The Dance of the Honey Bee	*Adam Lalak* Development, Parity and the Explananda of Natural Selection
3:00	*Kostas Kouvaris, Jeff Clune, Loizos Kounios, Markus Brede and Richard Watson* Memory and Learning in Gene-regulation Networks	*Adrian Currie and Alison McConwell* Gouldian Arguments & The Sources of Contingency

3:30 – 4:00 Coffee in foyer

4:00 – 5:00 Parallel sessions

	LT3	G77A
4:00	*Daniel Nicholson and John Dupre* Structure and Function: A Process-Centered View	*Stijn Conix* The Role of Values in Biological Taxonomy
4:30	*Mario Villalobos* Elimination Instead of Naturalization: Against the Organizational Theory of Biological Functions	*Thibault Racovski* Novelty in Plants and the Generalisation of Biological Theories

5:00 – 6:00 Keynote: Carolyn Price (LT3)

6:00 Meeting ends
