Please complete and post to Patient Administration Team, Bristol Dental School, 1 Trinity Quay, Avon Street, Bristol, BS2 0PT

Please be aware of our patient acceptance criteria, our sole purpose is clinical education and training, and therefore will reject any referrals that do not meet the needs of our students. Our acceptance criteria can be found here.

The Dental School will accept patients for endodontic treatment on a shared care basis. Referral will require that all other patient’s dental health needs will still be the responsibility of the referring clinician. All patient’s restorative treatment will have had to be completed before referral. The school will accept patients whose endodontic treatment needs falls under the category level 1 (care that is expected by a general dental practitioner in primary care). On completion of treatment the patient (usually including endodontic treatment plus Crown) will be referred back to your care with a report of treatment provided for ongoing maintenance under your care. The school will endeavour to also provide the appropriate coronal restoration before referral back to your care.

### ACCEPTANCE CRITERIA

Cases will be considered for acceptance based on the following criteria;

- Can accept treatment under routine local anaesthetic
- If the patient has a stable oral environment
- The tooth/teeth which require treatment are of strategic importance and can be made predictably functional with a favourable prognostic success rate.
- Root canals with a curvature <30 degrees to root axis and considered negotiable, from radiographic evidence, through their entire length.
- No root canal obstruction or damaged access, e.g. perforation.
- Routine dismantling of plastic restorations, crowns and bridges to assess restorability.
- Pulp extirpation as an emergency treatment.
- Incision and drainage as an emergency treatment.
- Straightforward retreatment.
- Patients who cannot meet NHS charges

Patients will not be offered treatment if:

1. They have an unstable oral environment i.e. poor oral health, active caries and/or active periodontal disease
2. They are “keen to save” the tooth/teeth but the prognosis is considered poor
3. The tooth is a second or third molar unless it is of strategic value to the overall treatment plan
4. They require sedation or GA for routine dental treatment.

Please refer to our full acceptance criteria.
