

Collaborating on NVivo

Merve Mollaahmetoglu

PhD student at the University of Exeter

Important notes

- In the latest version of NVivo 2020, codes=nodes (this distinction is removed to avoid confusion)
- However in the version that I use in this demonstration it is still referred to as nodes, but the meaning is the same
- The demonstrations are mostly from NVivo 2012, but most features and functions are similar with new versions

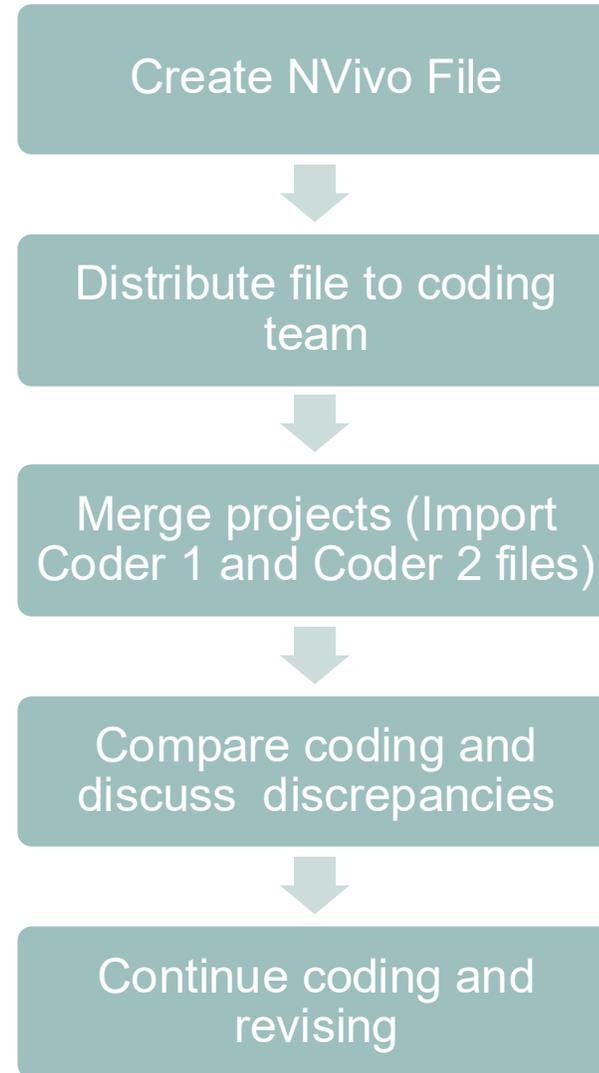

NVivo tools to facilitate collaboration

General collaboration tips	In NVivo
Check Intercoder reliability	Merge projects Run coding comparison queries
Ensure frequent communication between team members	Visual coding comparison
Write down notes and record key decisions Develop a team protocol Keep a research journal (team or individual)	Memos or annotations
Prepare a codebook	Code description box

Merge projects

Coding comparison query

- You can run a coding comparison query to calculate the interrater reliability between your coders
- This will display the Kappa Coefficient and the agreement and disagreement rates between coders

Barbara

I got a degree in geology. When I came back here with my husband, I had done plenty of field mapping and working with GIS, and so I got a job with a soil scientist here who helps people try to get septic permits – and environmental field assessments, watershed mapping, wetland delineation.

Henry

What kind of insight has that given you into the area, given your particular professional angle?

Barbara

Well, the one thing is that it's very low. The land is so low and the water table is so high. And it's tough for people to get septic permits. As environmental standards have gotten more stringent, some local people that have inherited land are finding that they can't get a permit, or they have but they have to install a very, very expensive pretreatment system, which is too much to pay for. And so I've seen it be a challenge for local people who are trying to stay where they grew up. And so that's a big limiting factor right now for development, which is okay. But it's interesting. Sometimes it's tough when people can't build the house on their land that they inherited or can't do anything with their land, but I understand the limitations also. It's critical to maintain the water quality.

There are people who have even purchased land that they were told could get a system or thought could get a system or just sort of in an unofficial way looks like it. There are options

Henry
Talk about changes that you've seen in this area.

Barbara
The biggest change that I'm aware of is the sense – I think that now there's the sense commercial fishing as a livelihood is dying as a viable option. And I know – I think that change since 30 years or 35 years ago. I don't remember that being sort of this sense For me that's the most profound. That's a huge thing that I think is very sad. And that with – that's such a complex situation -- the water quality and also the overharvesting, tearing up of the bottom – all these different things that are factors.

Imported seafood is so much cheaper. And the little sea-side restaurants around here local shrimp on their shrimp burgers. The fancy restaurants have local seafood. Even stocks are fine, it's that you can't make a living spending backbreaking work getting p earning nothing, very little.

Henry
Yeah. So it's a combination of environmental factors and market forces?

Barbara

Memos and annotations

- Annotations are similar to notes on the side of a paper or a footnote
- You can use annotations to create a note for a team member
- Annotations can be seen by other team members once the projects are merged
- You can see who created the annotations and who modified them by their initials

Henry
Is this, where we are today, is this inherited family land that's still part of the family?

Dorothy
 Yes, yes. I know both my grandparents were born and raised further on down the road toward the shore. And this land here, I don't know who it belonged to at the beginning, but they could go in and clear a plot of land and claim it. And that's what my granddaddy and two of his brothers did.

Q.2. Connection to Down East natural environment

Henry
Are there particular places Down East that are important to you? I mean, you talk about how special the whole area is. Are there particular parts of it that are particularly important?

Dorothy
 Well, here, of course, Williston, of course. I love Harkers Island. I love Atlantic. Davis is nice. Well, every place in the county is nice. But of course, Williston is my favorite. But all of Down East is important. You can go anywhere in the world, and when you head back home, and you

Memorable quotes: Dorothy, Balance vs. mixed feelings

Click to edit

6/28/2010 6:25 PM

We may need to clarify the distinction between the code 'Balance' and the code 'Attitude:Mixed'. We have identified 'Balance' as a potentially important theme, since solutions to the challenges facing Down East are likely to involve striking a balance among multiple competing imperatives. When the statements of research subjects refer specifically to achieving this balance, then the 'Balance' code is appropriate. In other cases, subjects may simply be expressing ambivalence about an issue: acknowledging multiple sides of the issue but not necessarily identifying the need to balance among them. In this case the 'Attitude:Mixed' code may be more appropriate. We should revisit our coding to these codes and make sure it is consistent.

Memorable quotes Dorothy Balance vs. mixed feelings Notes from Carteret County Cro _Project protocol memo

Click to edit

5/15/2010 2:16 PM

Welcome to the Down East project team protocol memo! This memo is designed to set out some consistent procedures and practices for our research team.

Our goal is to learn about community views of land use and environmental change in Down East, North Carolina, an area comprised of 13 distinct residential communities. The results of this work will document these community perceptions, and results will be made available to local stakeholders to facilitate public dialogue about the area's future and to help communities, developers, and planners envision long-term strategies for sustainable land use and development.

We are using pseudonyms for individuals. Wanda is keeping the master list that matches respondents to pseudonyms. Please let her know if you need a pseudonym for someone. **The process for allocating pseudonyms is contained in her research journal.**

For Ken's video, which is transcribed verbatim, Wanda would like several of the team to code on the audio or video timeline, and others to code on the transcript, so that we can compare not only multiple coders on the same time/text, but also coding on the transcript versus digital file. Wanda and Henry will code only on the digital file, Effie will code only on the transcript.

At the beginning of each work session, open two memos. First, open your own memo so that you can log questions or suggestions for the team. Second, open the team project process memo so you can summarize your activities.

Environmental Change Down East

Nodes

Name	Description
Attitude	A person's general feeling of favorableness or unfavorableness. Synonym: affect (Ajzen and Fishbein) Evaluation of people, objects, and ideas (Aronson). A set of beliefs.
Mixed	A person's statement that they are indecisive as to whether their attitude is positive or negative. If a person states two different views, such as that they are positive about one aspect and negative about another, this is not mixed, but rather multiple, feelings.
Negative	A negative opinion or a disagreement where an opinion is not shared with someone or with a group.
Neutral	
Positive	specifying positive opinion oro agreement with other stakeholders or with an idea. A shared opinion
Balance	
Community change	Change to the people, culture, or built structures of the communities Down East
Economy	Text coded around issues of economy, jobs, livelihood, cost of living, etc.

Creating new codes

- Creating new codes independent of the teams coding
- E.g. Merve's codes- give a description and pick a colour to distinguish the new codes
- Put the new codes in a separate folder so they are not confused with the team's coding
- When the project is merged, these codes will come in a separate folder and can be reviewed by other team members

Framework matrix

- Framework matrix allows you to look across multiple codes across multiple cases (participants)
- Good way of sharing your codes with someone who doesn't have access to Nvivo as you can export to Excel

	B : Balance	C : Economy
1 : Betty Community = Straits Gender = Female Generations Down East =... Township = Straits	set that with places for us to a big problem	On the other side, I really wish we had places for the young folks to be able to at least for a short time, or until they could get on their feet to be able to afford their own homes, place for them to be able to live. There's not a whole lot of that down here -- affordable anyway. You buy a piece of land, and you've spent just about all your money just on the land itself. In that respect, just small communities, not the big condos, and not the big stuff, just homes that our children or other folks in the community, their children can at least afford to live.
		Well, I've lived in this area - well, I've lived in this house since '63. I was born and raised in the house next door. I know both of my sets of my

<Files\Interviews\Betty and Paul> - 5 1 reference coded [69.48% Coverage]

Reference 1 - 69.48% Coverage

I have kind of mixed feelings about that in terms of.... One thing we see right here, we have lot to live in the little bit of woods we have left, and you see them on the road all the time where t killed. I wish we had areas that that wildlife could still grow and not be in danger of being killed highway. On the other side, I really wish we had places for the young folks to be able to at least time, or until they could get on their feet to be able to afford their own homes, place for them live. There's not a whole lot of that down here -- affordable anyway. You buy a piece of land, a just about all your money just on the land itself. In that respect, just small communities, not th and not the big stuff, just homes that our children or other folks in the community, their childr afford to live. I don't want it to grow where we have all the condos. I'm very fearful that we've over that particular bridge and we're on that way. But if we could still have those small commu atmosphere, family-oriented, church..... I grew up we always went to church, still go to the san not have just...not industry, but big condos, big developments that don't look like what we gre able to go to the shore, and we still have our waterfront lot, and being able to go down there a nice. It still looks natural. The one thing that maybe we all don't talk enough about down here waters clean. We can certainly play a big part in that in doing what we can to not pollute it, bu part of it, there's many businesses down here that will lose everything they have as well. The w important. If we just keep some wooded area available for the wildlife that still lives around he important. To offset that with places for us to live is a big problem.

3 : Barbara Community = Bettie Gender = Female Generations Down		There are people who have even purchased land that they were told could get a system or thought could get a system or just sort of in an unofficial way looks like it. There are options and there are hard luck sort of considerations that the county tries to help people. But it's a balance between helping people who have these hardship situations and protecting the environment. And that's difficult as the person on the ground telling the landowner, "Sorry," and especially when it's not a developer. It's just a young couple or something.	I particularly enjoy being out on the water Down East. And my - he's not really my uncle, but a friend who I call an uncle - I just help him set his flounder nets and things like that. He does fishing, commercial fishing, but actually he's not commercial, just for his own freezer. And he knows everything about the water and just living off of the land - the seafood here. The biggest change that I'm aware of is the sense - I think that now there's the sense the commercial fishing as a livelihood is dying as a viable option. And I know - I think that that is a change since 30 years	Well, the one thing is that it's very low. The land is so low and the water table is so high. And it's tough for people to get septic permits. As environmental standards have gotten more stringent, some local people that have inherited land are finding that they can't get a permit, or they have but they have to install a very, very expensive pretreatment system, which is too much to pay for. And so I've seen it be a challenge for local people who are trying to stay where they grew up. And so that's a big limiting factor right now for development, which is okay. But it's interesting. Sometimes it's tough when

Collaboration options on NVivo

- Standalone NVivo
- **Collaboration Cloud**
- Collaboration Server

Collaboration Cloud

- Project manager purchases Collaboration Cloud for a team
- Switch account to project lead's account before logging into Collaboration Cloud
- Workspace managers: upload new projects, merge projects and assign roles
- Collaborators: assigned to work on a project
- As collaborators, you can download Masterfile, work offline, upload your file as a version and indicate to the workspace manager that you are ready to merge your project

Administrators open the USERS page here, to assign account roles

Each subscription has 24 GB storage space

WORKSPACES

Storage

101 MB of 24 GB (0%) used

Start a new workspace by:

Upload

Workspace owners can upload project files to create new workspaces

View:

✓ All projects

Active projects only

Completed projects only

This column shows the total size of all file versions in each workspace

Workspace	Project	My role	Size	Members	Status
LibrarySurvey	LibrarySurv...	Workspace Mana...	24 MB	JJ LJ SN JR	Active
CitySurvey	CitySurvey.n...	Collaborator	8 MB	JJ BM LJ +2	Complete
HotelSurvey	HotelSurvey...	Workspace Mana...	69 MB	LJ SN JJ BM	<input checked="" type="checkbox"/> Active

Click on a workspace name to open it in its own tab

Workspace owners can change workspace status and delete workspaces they created

Info

Help

Screens opened with these icons have actions applied to the current workspace:

- upload file versions
- view & download all versions
- add users
- see workspace stats & change name

LibrarySurvey X

This is a workspace tab as seen by a project manager; collaborators see the same, but have fewer options

LibrarySurvey

View: Collaborators only Workspace managers only **✓ All users**

The most recent version of the project master file shared with each user

Collaborators have only one action available: to mark their personal version as ready to merge

Username	Role	Master Project	Status	Actions
LJ Lin Jones	Workspace Manager × Collaborator	V2	In Progress	
SN Scott Nott	Collaborator ×	V2	In Progress	
JR <i>Lin Jones</i> (me)	Workspace Manager	Not Shared	Not applicable	

User status can be:

- In progress
- Ready to merge (flagged by user)
- Merged (user can no longer contribute)

Actions available to workspace managers:

- download the user's most recent personal version,
- share the latest master version with them,
- remove the user from the workspace

Collaboration Cloud

- Ideal for teams of 2-5
- Users should be on the same operating system for ideal results
- Added value of collaboration cloud:
 - Easier to send download and upload projects
 - Team members in one place
 - Multiple projects within the same team or with different teams
- More information on Collaboration Cloud:
<https://help-nv.qsrinternational.com/20/win/Content/projects-teamwork/nvivo-collaboration.htm>

Collaboration options on NVivo

- Standalone NVivo
- Collaboration Cloud
- **Collaboration Server**

Collaboration Server

- Allows you to install on a dedicated server at your organisation/university
- Teams can go in and work on the same project simultaneously
- More information on Collaboration Server:
<https://help-nv.qsrinternational.com/20/win/Content/projects-teamwork/nvivo-for-teams.htm>
