

EUROPEAN COMMISSION
RESEARCH EXECUTIVE AGENCY

THE 2012 PEOPLE PROGRAMME GUIDE FOR APPLICANTS

MARIE CURIE ACTIONS (Call-Specific)

Marie Curie International Outgoing Fellowships for Career
Development (IOF)

Call identifier FP7-PEOPLE-2012-IOF

Closing Date: 16 August 2012 at 17:00:00 (Brussels local
time)

To be read in conjunction with the Guides for Applicants,
Common and Ethics Parts

Date of publication: 01/04/2012

Version Number: 2012.2

Please note

The 2012 Marie Curie Actions are:

FP7-PEOPLE-2012-CIG
FP7-PEOPLE-2012-COFUND
FP7-PEOPLE-2012-IAPP
FP7-PEOPLE-2012-IEF
FP7-PEOPLE-2012-IIF
FP7-PEOPLE-2012-IOF
FP7-PEOPLE-2012-IRSES
FP7-PEOPLE-2012-ITN

Guides for Applicants for any other action in the People Programme, or indeed in any FP7 programme, can be found by following the links at <http://ec.europa.eu/research/participants/portal>

This Guide is based on the rules and conditions contained in the legal documents relating to FP7 (in particular the Seventh Framework Programme, Specific Programmes, Rules for Participation, and the Work Programmes), all of which can be consulted via the Participant Portal.

This Guide does not in itself have any legal value, and thus does not supersede those documents.

ANNEX 3 – INSTRUCTIONS FOR COMPLETING "PART A" OF THE PROPOSAL	31
ANNEX 4 – INSTRUCTIONS FOR DRAFTING "PART B" OF THE PROPOSAL.....	46

This is a **Corrigendum to the Guide for Applicants** published on 13 March 2012 Version Number: 2012.1 for the call:

FP7-PEOPLE-2012-IOF

The Corrigendum replaces **point 4.2 "How is the European Union contribution estimated?"** of the above mentioned Guide for Applicants. The changes are the followings:

- Amounts for the reintegration phase are modified with the correct PT correction coefficient of 85%.

FP7-PEOPLE-2012-IOF

This guide for the Marie Curie International Outgoing Fellowships has been revised and **some of the main changes** with regard to the 2011 Guide for Applicants are:

Change in the criteria for evaluation:

- **S & T Quality:** the subcriterion "Quality of the group/scientist in charge" has replaced the subcriterion "Quality of the group/supervisors";
- **Researcher:** Any leave of absence in the research career of more than one year such as maternity/parental leave, sick or family care leave, military service, humanitarian aid work, etc. will be taken into account in the assessment of the research experience;
- **Impact:** the subcriterion "Impact of competencies acquired during the fellowship on the future career prospects of the researcher, in particular through exposure to transferable skills training" has replaced the subcriterion "Potential of acquiring competencies during the fellowship to improve the prospects of reaching and/or reinforcing a position of professional maturity, diversity and independence, in particular through exposure to transferable skills training";
- **Impact:** the subcriterion "Contribution to European excellence and European competitiveness through valuable transfer of knowledge during the return phase" has replaced the subcriterion "Contribution to European excellence and European competitiveness";
- **Impact:** the subcriterion "Benefit of the mobility to the European Research Area" has been removed.

Definitions used throughout this Guide

Experienced researchers must, at the time of the relevant deadline for submission of proposals be in possession of a doctoral degree or have at least four years of full-time equivalent research experience.

Full-time equivalent research experience is measured from the date when a researcher obtained the degree which would formally entitle him or her to embark on a doctorate, either in the country in which the degree was obtained or in the country in which the research training is provided.

Host organisation (return host organisation) is the legal entity established in a EU Member State (MS) or Associated Country (AC) with which the REA will sign the *grant agreement* and where the re/integration phase of the project is going to take place;

Partner organisation (outgoing host organisation) is a legal entity established in an Other Third Country where the outgoing phase will take place. The partner organisation will conclude a *partnership agreement* with the host organisation;

Partnership agreement means the strategic partnership agreement signed between the host organisation and partner organisation for the purpose of the research training activities of the experienced researcher;

Other Third Countries are countries which are neither EU Member States nor associated to FP7 (Associated Countries).

Scientist in charge is the scientist team leader located at the *host organisation* who will supervise the researcher during the whole duration of the project. He/she will be the main contact person for the REA concerning the submitted proposal (e.g. for additional information, invitation to hearings, sending of evaluation results, invitation to negotiations).

Coordinator is the participant who is taking the lead in the preparation of the proposal as the "proposal coordinator". For a given proposal, the coordinator acts as the single point of contact between the participants and the REA. Please note that, before the call deadline, the researcher would be considered as the "proposal coordinator". However after the call deadline the *scientist in charge* will be the only single contact point. The researcher and the *scientist in charge* cannot be the same person.

Mobility: at the time of the relevant deadline for submission of proposals, researchers must not have resided or carried out their main activity (work, studies, etc) in the country of their host organisation for more than 12 months in the 3 years immediately prior to the reference date. Compulsory national service and/or short stays such as holidays are not taken into account. As far as international European interest organisations or international organisations are concerned, this rule does not apply to the hosting of eligible researchers. However the appointed researcher must not have spent more than 12 months in the 3 years immediately prior to the reference deadline for submission of proposals in the same appointing organisation.

Fellow is the eligible *experienced researcher* who benefits from the IOF fellowship in the host organisation.

Work Programme: 2012 People Work Programme, Commission Decision C(2011)5033 of 19 July 2011.

About the Marie Curie Action: International Outgoing Fellowships for Career Development (IOF)

1. General Description

1.1. Purpose

The specific objective of the Marie Curie International Outgoing Fellowships for Career Development is described in the 2012 People Work Programme:

"This action aims to reinforce the international dimension of the career of European researchers by giving them the opportunity to be trained and acquire new knowledge in a high-level organisation active in research, established in an Other Third Country (Outgoing phase). Subsequently, these researchers will return with the acquired knowledge and experience to an organisation in a Member State or Associated Country"

This action provides financial support to an individual mobility project presented by an *experienced researcher* in liaison with a host organisation in the Member States or Associated Countries.

Experienced researchers applying to this action need to develop a coherent research training project for the total duration of the contract that will enable the *experienced researcher* to progress in the development of his/her career. The fellowship is expected to be part of a structured, long-term personal career development plan that is coherent with past achievements and clearly defines the future aims of the researcher.

1.2. Organisations and persons involved

Proposals for IOF involve formally a *host organisation* established in a Member State or Associated Country, and a *partner organisation* established in an Other Third Country.

The project proposals are submitted by *experienced researchers* in liaison with a *host organisation* which is represented by the *scientist in charge*. A proposal should be submitted by the *experienced researcher* provided that he/she has the approval of the *host organisation*. The *experienced researcher* (future *fellow*) and the *scientist in charge* are two different persons.

1.3. Contract modalities and duration

The Grant Agreement will be concluded between the REA and the (return) host organisation of the Member State or Associated Country.

International Outgoing Fellowships have a duration of between 24 and 36 months (full time equivalent), with an initial outgoing phase of 12 to 24 months and a final **mandatory** reintegration phase of 12 months within the return host organisation.

The fellow will be in a situation of secondment in the partner organisation during the outgoing phase. A **Partnership agreement** has to be signed between the *host organisation* and the *partner organisation* for the purpose of the research training activities complying with the obligations stemming from the grant agreement.

1.4. The topic of the Project

All Marie Curie actions have a **bottom-up approach**, i.e. all fields of research of interest to the European Union are eligible for funding (except areas of research covered by the EURATOM Treaty). All research carried out must respect fundamental ethics principles. (See also the Ethics part of the Guide for Applicants).

1.5. Classification of projects into eight research areas

Proposals will be classified into distinct Evaluation Panels under eight major areas of research: Chemistry (CHE); Economic Sciences (ECO), Information Science and Engineering (ENG); Environment and Geo-Sciences (ENV); Life Sciences (LIF); Mathematics (MAT); Physics (PHY); Social Sciences and Humanities (SOC).

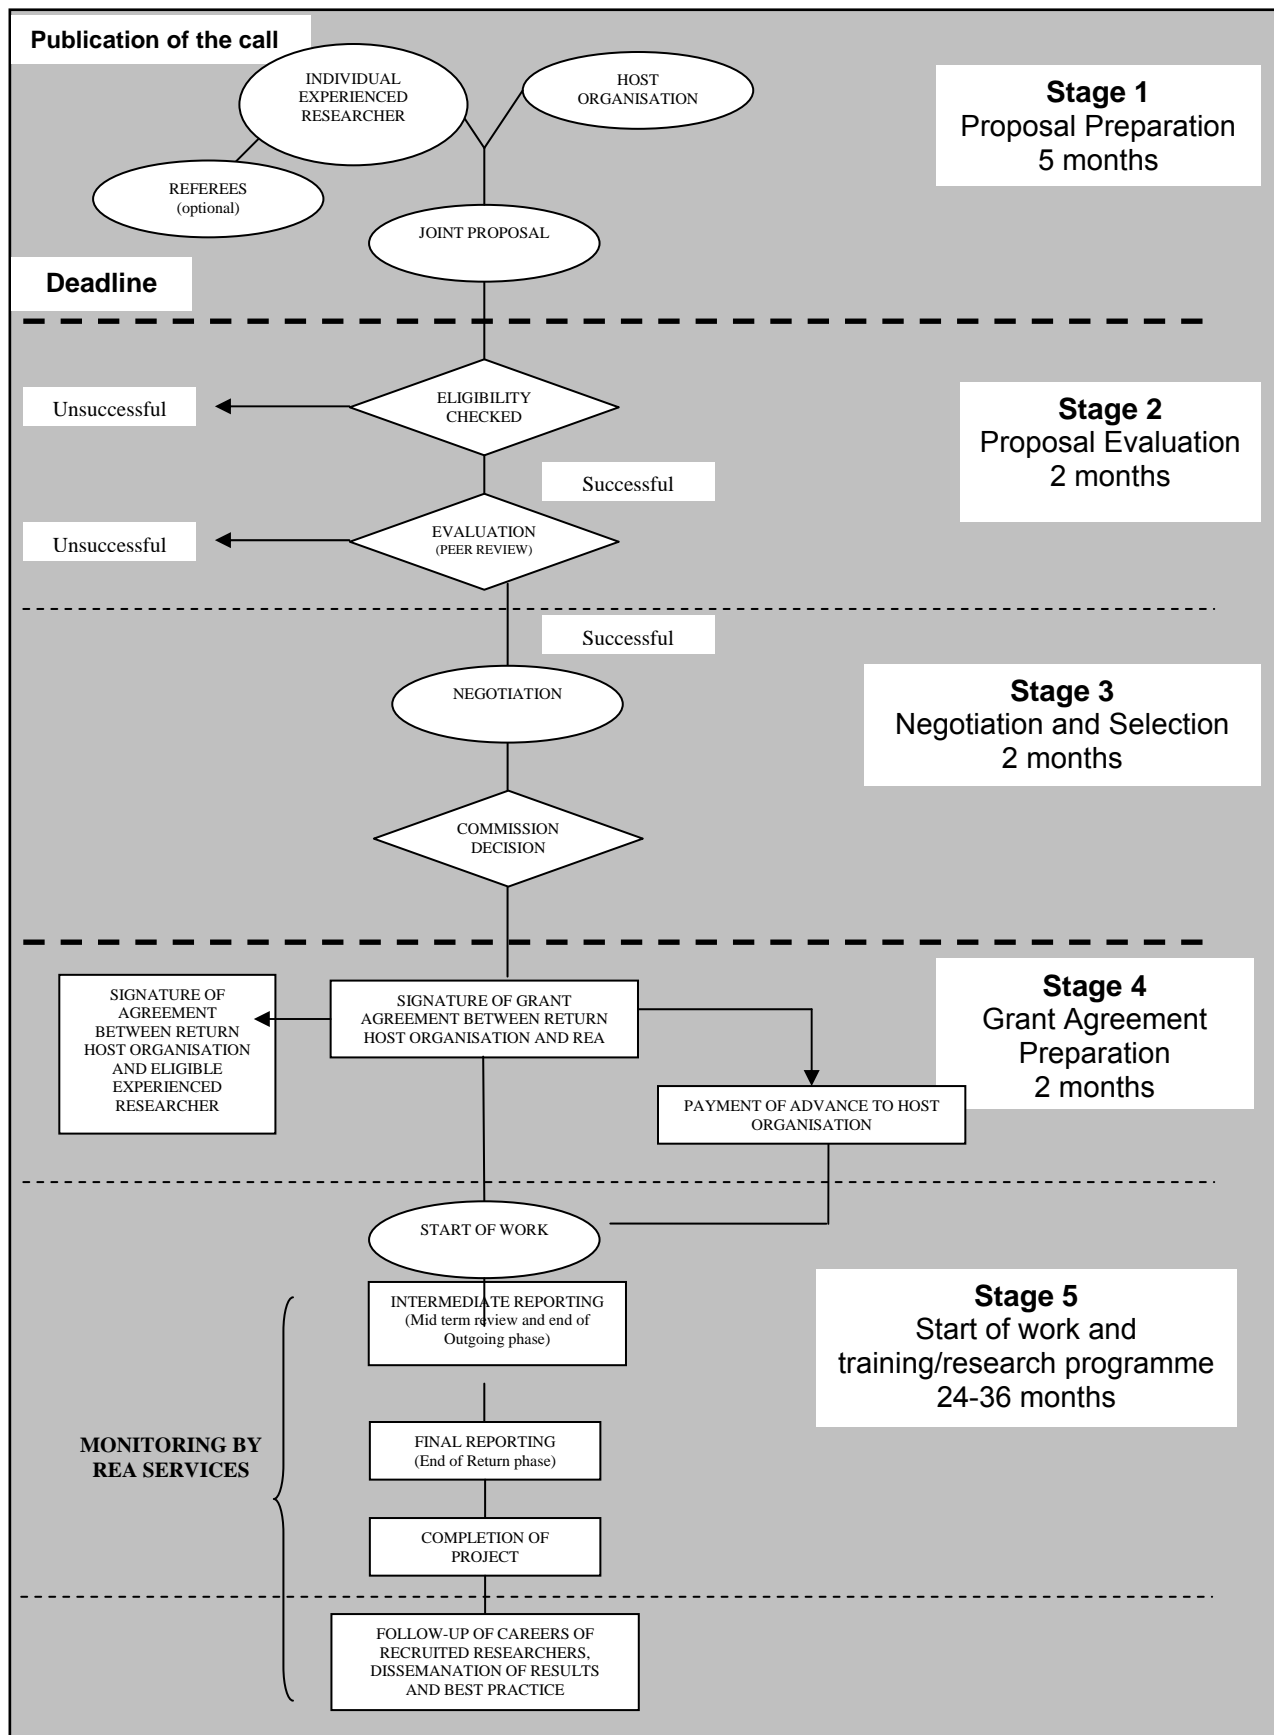

There is no predefined budget allocation among the panels. The budget will be distributed over the panels based on the proportion of eligible proposals received in each panel.

The applicant chooses the panel to which the proposal will be associated at the proposal submission stage and this should be considered as the core discipline. Additional keywords are used to define the other disciplines that may be involved. The choice of panel and keywords will guide the REA in the selection of experts for proposal evaluation. The REA reserves the right to move proposals from one panel to another.

To help you select the most relevant panel for your proposal a breakdown of each research area into a number of sub-disciplines is provided in Annex 3 of this Guide.

1.6. The lifecycle of an International Outgoing Fellowship

LIFE CYCLE OF AN IOF

2 Eligibility Criteria for Participating organisations, Researchers and Mobility

A number of eligibility criteria must be fulfilled **at the deadline for proposal submission**. After the deadline, submitted proposals will be checked for eligibility and those proposals that do not meet the criteria will not undergo evaluation and will be rejected.

These eligibility criteria will be checked on the basis of information provided by the applicant in the proposal, particularly information given in the part A form. Even if at a later stage, an eligibility criterion is found not to be fulfilled (for example, due to incorrect or misleading information contained in the proposal), the proposal will be rejected.

2.1. *The Return Host Organisation*

Participants are legal entities established in Member States or Associated Countries¹. Further details can be found in the Guide for Applicants (Common part)

'Legal entity' means any legal person created under the national law of its place of establishment, or under Union law or international law, which has legal personality and which may, acting in its own name, exercise rights and be subject to obligations.

Many different types of *host organisation* can take part in IOF such as:

- National Governmental or public organisations (e.g. universities, research centres etc);
- International Organisations;
- Commercial enterprises, including those of small and medium size (SMEs);
- Non-profit or charitable organisations (e.g. NGOs, trusts, etc.);
- International European Interest Organisations (e.g. CERN, EMBL, etc.);
- The Joint Research Centre of the European Commission.

The initial part of training (the outgoing phase) is to be spent in 1) a distinct legal entity from the return host organisation and 2) established in an Other Third Country (*partner organisation*), where the *experienced researcher* is seconded.

2.2. *Experienced Researchers*

International Outgoing Fellowships are directed exclusively at **experienced researchers**, namely those who either:

- i. have at least 4 years of research experience (full-time equivalent) after obtaining the degree which would formally entitle them to embark on a doctorate either in the country in which the degree was obtained or in the country in which the research training will be provided; or***
- ii. are already in possession of a doctoral degree (PhD).***

The **time limit to fulfil** one of these conditions is the **deadline** for proposal submission of the relevant call.

¹ Please note the distinction between the research entity (i.e. the lab where the fellow will carry out her/his project) and the legal entity (i.e. the legal person with whom REA signs the grant agreement for example, the University of X).

The required research experience does not include breaks during the research career of a researcher, irrespective of the reason (e.g. working outside research, family reasons, etc.).

Note that in the context of Marie Curie actions, Medical Doctor (MD) studies are not taken as equivalent to PhD studies. For MDs, the requirement of 4 years of full-time research experience will apply. This equivalence should be strictly regarded as a specific objective of the Marie Curie actions (evaluation of research experience), and should not be regarded as conflicting with national rules in some Member States or Associated Countries, which may recognise the equivalence of MD and PhD for other reasons (e.g. for career progression in the public sector).

Examples:

Applicants eligible as experienced researchers

A) A researcher who does not have a PhD but has worked full-time in research for the last 4 years after obtaining a university degree giving access to a doctorate prior to the deadline for proposal submission;

B) A researcher who was awarded a PhD 2 years prior to the call deadline but has not been working in research since.

Applicants not eligible as experienced researchers

A researcher who has 3 years and 9 months full time research experience and who expects to obtain a PhD 2 months after the deadline for proposal submission.

If you are at an early stage of your career and do not have the level of experience that allows you to comply with one of the above criteria, you may still be eligible to participate in other Marie Curie actions directed at early-stage researchers. (See Marie Curie action Initial Training Networks (ITN)).

2.3. Nationality or residence requirements

Experienced researchers must also comply with a condition regarding nationality or residence.

Experienced researchers shall be considered eligible under this action **if they are nationals of a Member State or Associated Country**. However researchers from Other Third Countries who have been residing and carrying out their main activity in Member States or Associated Countries for at least the 5 years prior to the submission deadline are also eligible for this action.

Examples

Applicants complying with the nationality rules:

An Indian national who has resided and worked continuously in France for the past 6 years may apply for a fellowship in Canada (outgoing phase) along with a mandatory return phase in any Member State or Associated Country.

Applicant not complying with the nationality rules:

A Chinese national who has resided and worked in research in the UK during the last 4 years can not apply for an International Outgoing Fellowship.

2.4. Mobility Requirements

Researchers must comply with either of the mobility rules:

a) Mobility from a Member State or Associated Country to an Other Third Country:

- *Experienced researchers* must move **from a Member State or Associated Country to an Other Third Country**; Additionally, at the time of the relevant deadline for submission of proposals, researchers must not have resided or carried out their main activity in the country of the *partner organisation* (the outgoing *host organisation*) for more than 12 months in the 3 years immediately prior to the deadline for submission of proposals.

b) Mobility related to International European interest Organisations or international organisations

- *Experienced researchers* can apply to any International European Interest Organisations or international organisations established in an Other Third Country; however, *experienced researchers* must not have spent more than 12 months in the same organisation in the 3 years immediately prior to the deadline for submission of proposals;

Note that this exception is made only for mobility to an International European Interest Organisations or International Organisations and not from such international organizations to any national host organization.

The reintegration phase can be to any Member State / Associated Country, including, but not necessarily the *experienced researcher's* country of nationality or previous place of activity.

Examples:

Applicants complying with the mobility rules:

A) An experienced researcher with Danish nationality who has always resided in Denmark may apply for a fellowship in Australia (outgoing phase) along with a mandatory return phase in any Member State or Associated Country.

B) An experienced researcher with Hungarian nationality who resides and works in Germany may apply for a fellowship in the United States (outgoing phase) along with a mandatory return phase in any Member State or Associated Country.

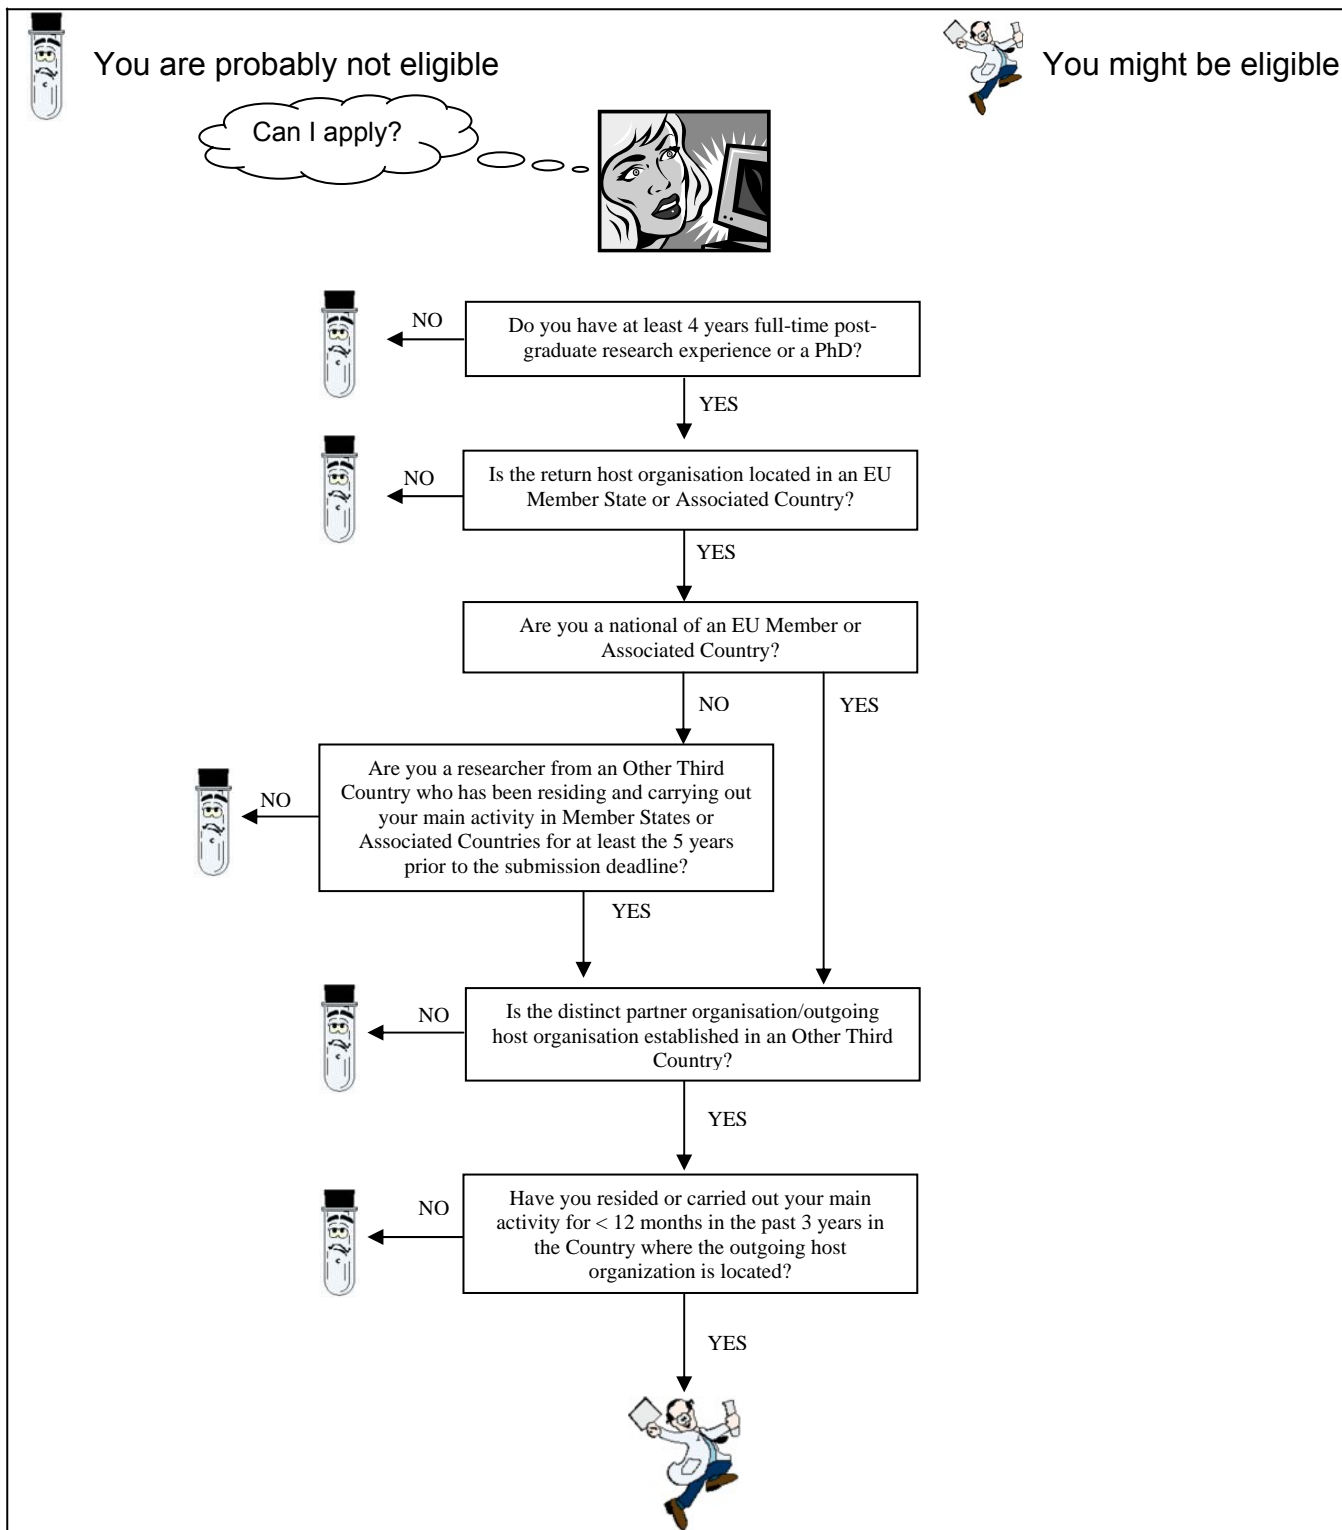

Applicant not complying with the mobility rules:

An experienced researcher with British nationality who has been residing 16 months in South Africa during the last 3 years can not apply for an International Outgoing Fellowship with an outgoing phase in South Africa.

2.5. Finding your way through the eligibility criteria

To find your way through the eligibility criteria outlined above, the flowchart on the following page summarises them

SUMMARY CONDITIONS FOR ELIGIBILITY FOR AN IOF

2.6. *Inviting Referees' Assessments of your Proposal*

The basis of the proposal evaluation is independent peer review by international experts. These experts are chosen by the REA. It is not possible to suggest or exclude experts. However, in order to aid these experts' evaluation of the part of the proposal which is about you as a researcher, it is possible (not obligatory) to invite up to three referee assessments from scientists who know you and can testify about your potential as a researcher. These assessments are submitted by the referees directly to the REA via the Electronic Proposal Submission System (EPSS). The procedure for doing so is explained in the Guide for Applicants (Common Part).

3 Expected Activities of an International Outgoing Fellowship for Career Development

3.1. Training activities

The main activities of an IOF will be based on a training-through-research project prepared by the *experienced researcher* in liaison with the *host organisation*. The project aims to reach a realistic and well-defined objective in terms of career advancement, for example strengthening or attaining a leading independent position, and to develop and widen the competences of the *experienced researcher* significantly, in particular in terms of multi- or interdisciplinary expertise, inter-sectoral experience and complementary skills.

Such training activities might include:

- Primarily, training-through-research under supervision by means of an individual personalised project;
- Hands-on training activities for developing scientific (new techniques or instruments, etc.) and complementary skills (proposal preparation to request funding, patent applications, project management, task coordination, technical staff supervision, etc.);
- Inter-sectoral or interdisciplinary transfer of knowledge;
- Capacity to build collaborations;
- Taking active part in the research and financial management of the project;
- Developing organisational skills through organisation of training or dissemination events.

A **Personal Career Development Plan** will be established by the *experienced researcher* and the scientist in charge prior to the start of the project in order to aid in the provision of the research training programme and research objectives that best suit the needs of the *experienced researcher*. This plan will act as a reference for the *experienced researcher* herself/himself to monitor the progress and take corrective action when necessary in order to attain the target set in terms of professional development. Models of personal career development plans can be found at: <http://ec.europa.eu/mariecurieactions>.

3.2. Outreach Activities

In the Marie Curie Actions, Outreach Activities are defined as dissemination initiatives directed towards the general public, rather than the research community. The primary goal of the Outreach Activities is to create awareness in the general public about the research work performed and its implications for the citizens. The outreach activities plan submitted by each applicant will be assessed during the evaluation of proposals. The type of outreach activities can be freely chosen by the applicants and could range from press articles to exposing students from primary and secondary schools or universities to science, research and innovation in order to develop their motivation to embrace research careers.

4 Financial Regime

The conditions for funding the activities undertaken by the *experienced researcher* in order to attain the project deliverables are defined in the People Work Programme. The contribution relates to the costs of the Fellowship and directly related costs only. The *host organisation* must cover all other costs connected to hosting the *fellow* and related to the implementation of the project.

4.1. What types of expenses are covered?

The financial support for International Outgoing Fellowships takes the form of a grant covering up to 100% of the budget, according to a system of flat rates for eligible cost categories, comprising the following components:

- a monthly living allowance :

This refers to the basic monthly amount to be paid to the *experienced researcher* (see Table 3.1 in Annex 3 of the *Work Programme*). This is then adjusted, applying a correction factor for the cost of living in the country in which s/he will be working, i.e. that of the outgoing or return host (as shown in Table 3.2 in Annex 3 of the *Work Programme*).

The living allowance is a European Union contribution to the gross salary costs of the *fellow*. Consequently, the net salary results from deducting **all** compulsory social security contributions (employee's contribution and employer's contribution, where applicable) as well as direct taxes (e.g. income tax) from the gross amounts.

Social security contributions and taxation vary from country to country. In order to obtain an estimate of the actual net allowances for the experienced researchers, it is recommended to consult the host organisation and/or the relevant National Contact Point (see Annex 1 for link to the list of National Contact Points).

As a general rule the *experienced researcher* is appointed under an employment contract except in adequately documented cases or where national regulation would prohibit this possibility. When an employment contract cannot be provided, the *experienced researcher* must be recruited under a status equivalent to a fixed amount fellowship, provided that it is compatible with the national legislation and that adequate social security is provided (but not necessarily paid from the fellowship).

As a general principle the choice of appointment type should be made in accordance with the best interests of the experienced researcher. The European Charter for Researchers and the Code of Conduct for the recruitment of researchers offer a reference framework for the employment of researchers.

In all cases, *host organisations* must ensure that the *experienced researcher* is covered under the social security scheme which is applied to employed workers within the country of the contractor, or under a social security scheme providing adequate protection and covering the *experienced researcher* in every place of implementation of the IOF activities.

The *host organisation* may pay a **top-up** to the eligible *experienced researchers* but the *experienced researcher's* gross salary may not be below the fellowship amount provided by the European Union.

- a monthly mobility allowance

This is a monthly payment of a flat rate contribution amount to be paid to the *experienced researcher* and to cover expenses related to the mobility (relocation, family expenses, language courses, travel expenses etc.). As for the living allowance, a correction factor for the cost of living of the country of execution of the project is applied (see Table 3.2 in Annex 3 of the Work Programme). There are two reference amounts depending on the family situation of the *experienced researcher* at the time of the relevant deadline for submission of proposals:

- €1,000/month: *experienced researcher* with family obligations. In this context family is defined as persons linked to the researcher by (i) marriage, or (ii) a relationship with equivalent status to a marriage recognised by the national legislation of the country of the host organisation or of the nationality of the researcher; or (iii) dependent children who are actually being maintained by the researcher;
 - €700/month: *experienced researcher* without family obligations.
- a contribution to the training expenses of the eligible *experienced researcher*
This contribution is managed by the *host organisation* for expenses related to the participation of the *experienced researcher* in research and training activities. It may cover **all** costs related to the successful execution of the project by the *fellow* (e.g. *purchase of consumables, participation in conferences and training courses, fees for scientific journals, memberships of scientific associations etc.*), and which would normally not arise if the *fellow* was not hosted at the *host organisation*, are eligible. This contribution is paid as a flat rate:
 - €800 per researcher-month
 - Contribution to overheads:
Flat rate of €700 per researcher-month, to which the correction factor for the cost of living as referred to in Table 3.2 of Annex 3 of the Work Programme, is applied.

4.2. How is the European Union contribution estimated?

Applicants are not required to calculate the amount of the estimated European Union contribution. This will be automatically calculated from the information contained in the A4 proposal submission form of the proposal, using the rates, allowances and coefficients given in Annex 3 of the *Work Programme*. If the proposal is selected for funding, the European Union contribution will be calculated more accurately during the negotiations taking into account any recommendations made by the independent evaluators.

The maximum amount of the grant will be fixed in the grant agreement after the negotiation phase.

The example below aims to help understand the way the contributions are calculated.

Example: An *experienced researcher* with 6 years experience and family charges, going from Lisbon (PT) (where s/he has always resided and worked) to Harvard, Boston (USA) for a 2 year outgoing phase and a 1 year re-integration phase in Lisbon (PT) under an employment contract.

Outgoing Phase

- Living allowance: € 58,500 x 2 years = € 117,000
- Mobility allowance: € 1,000 x 24 months = € 24,000
- Training expenses: € 800 x 24 months = € 19,200
- Contribution to overheads: 700 x 24 months = € 16,800

Correction factor for USA = 101.3%

$(\text{Living allowance} + \text{Mobility allowance} + \text{Overheads}) \times \text{Correction factor for the USA} + \text{Training expenses} = \mathbf{€ 179,051.40}$

Re-integration Phase

- Living allowance: € 58,500 x 1 years = € 58,500
- Mobility allowance: € 1000 x 12 months = € 12,000
- Training expenses: € 800 x 12 months = € 9,600
- Contribution to overheads: 700 x 12 months = € 8,400

Correction factor for Portugal = 85.0%

$(\text{Living allowance} + \text{Mobility allowance} + \text{Overheads}) \times \text{Correction factor for Portugal} + \text{Training expenses} = \mathbf{€ 76,665.00}$

- Total European Union Contribution = € 179,051.40 + € 76,665.00 = € 255,716.40

In summary:

Contribution	Budget (€)
Contribution for the benefit of the <i>experienced researcher</i>	231,558.00
Contribution to overheads	24,158.40
Total maximum EU contribution	255,716.40

5 The Project Phase

Successful proposals will be invited to enter into negotiation with the REA. On the basis of the information provided in the proposal (particularly part A of the proposal) and the recommendation by the independent experts, a "*grant agreement*" will be then prepared and sent to the *host organisation* ("*beneficiary*"). The *grant agreement* should be signed in duplicate by the *host organisation* and returned to the REA for signature.

The partner organisation does not sign any grant agreement with the REA. The partner organisation signs a partnership agreement with the host organisation (beneficiary). In addition, the *host organisation* signs an agreement² with the selected *experienced researcher* in line with the provisions of the *grant agreement*. The signature of the employment contract and the start of the project will normally take place after the *grant agreement* enters into force, i.e. after its signature by the REA.

The accomplishment of a reintegration phase for the *fellow* in the European host organisation is fundamental for a successful achievement of the objectives of this action. In the *grant agreement* between the return host organisation and the REA it is therefore clearly stressed that the *fellow* has to undertake a **mandatory period of re-integration** at the *host organisation* following the outgoing phase.

In the case of non-fulfilment of this condition, the *host organisation* has to reimburse the total amount received from the REA for the benefit of the *experienced researcher* under this grant agreement.

The *grant agreement* also stipulates that if the responsibility for non-fulfilment of the return clause lies with the *fellow*, the host organisation **must take all appropriate measures (including legal action) to recover from the *fellow* the total amount received** for his/her benefit under the *grant agreement*, in order to reimburse this amount to the REA.

5.1. Key elements of the host organisation - experienced researcher agreement

The agreement between the *host organisation* and the *experienced researcher* must determine, in accordance with the *grant agreement*, the conditions for implementing the research training activities and the respective rights and obligations of the *experienced researcher* and the *host organisation*. It must indicate the amounts that s/he is entitled to receive, the conditions of implementation of the project, the law applicable, IPR arrangements and social security coverage among other issues. The requirements to be respected are included in Annex III (Specific provisions) of the *grant agreement*, which should be annexed to the agreement. **Experienced researchers are strongly encouraged to read these provisions carefully and check that their agreements comply with the rules.** A copy of the model *grant agreement* is available from the [Participant Portal](#). Further information and assistance is available on the EURAXESS webpage: <http://ec.europa.eu/euraxess>.

The actual fellowship must not start until the agreement between the *fellow* and the *host organisation* is in place. This means that neither the REA nor the *host organisation* are under any

² As a general rule researchers must be appointed under an employment contract except in adequately documented cases or where national regulation would prohibit this possibility. When an employment contract cannot be provided, the experienced researcher must be recruited under a status equivalent to a fixed amount fellowship, provided that it is compatible with the national legislation and that adequate social security is provided (but not necessarily paid from the fellowship).

obligation to make any payments to *fellows* who unilaterally decide to start at an earlier date from that established in the agreement, and that *fellows* who take such steps do so at their own risk.

5.2. *Project suspension*

The REA must be informed immediately of interruptions of *fellows'* stays and appropriate justifications should be provided. Split stays provided for in Annex I of the *grant agreement* and integrated in the work plan are deemed to be approved by the REA.

If the fellow wants to suspend the execution of the project for personal, family or professional reasons unforeseen at the time of the signature of the *grant agreement*, a request for suspension should be submitted to the REA. The REA will not object to any requests for suspension when the *fellow* is entitled to maternity/parental leave established either by national law or internal rules of the *host organisation*. In all other cases, the REA's approval of such requests will depend on the justifications provided and the impact expected on the execution of the project.

5.3. *Part-time work*

In principle, *fellows* must work full-time on their training project. Exceptionally, part-time work can be accepted for personal or family reasons subject to prior approval by the REA. In such a case, the allowances will be adapted *pro rata* to the time actually spent on the project. Under no circumstances can the total contribution of the Union as indicated in the *grant agreement* be exceeded.

5.4. *Stays away from the host organisation's premises*

As a general rule, the project must take place at the *host and partner organisations'* premises. However, in some cases, stays away may be justified as part of collaborations or as part of the training.

The responsible REA project officer should be informed of any period of stay away from the *host and partner organisations'* premises which exceeds one month. In any case, *fellows* may not stay more than 30% of the duration of the fellowship away from the *host and partner organisations'* premises unless such stays **have been explicitly provided for in the original proposal and in the *grant agreement*.**

Annexes

- Annex 1 Timetable and specific information for this call
- Annex 2 Evaluation criteria and procedure
- Annex 3 Instructions for completing "part A" of the proposal
- Annex 4 Instructions for drafting "part B" of the proposal

Annex 1 – Timetable and specific information for this call

The **People Work Programme** provides the essential information for submitting a proposal to this call. It describes the content of the topics to be addressed, and details on how it will be implemented. The Work Programme is available on the Research Participant PORTAL call page (see <http://ec.europa.eu/research/participants/portal/page/people>). The part giving the basic data on implementation (deadline, budget, deadlines, special conditions etc) is also posted as a separate document ("call fiche"). You must consult these documents.

- **Indicative timetable for this call**

Publication of call	13 March 2012
Deadline for submission of proposals	16 August 2012 at 17.00.00 Brussels local time
Evaluation of proposals	1-26 October 2012
Evaluation Summary Reports sent to proposal coordinators ("initial information letter")	End of November 2012
Invitation letter to successful coordinators to launch <i>grant agreement</i> negotiations with the REA services	December 2012
Letter to unsuccessful applicants	From December 2012
Signature of first <i>grant agreements</i>	From February 2013

Annex 2 – Evaluation criteria and procedures to be applied for this call

1. General

The evaluation of proposals is carried out by the REA with the assistance of independent experts.

REA staff ensure that the process is fair, and in line with the principles contained in the Commission's rules³.

Experts perform evaluations on a personal basis, not as representatives of their employer, their country or any other entity. They are expected to be independent, impartial and objective, and to behave throughout in a professional manner. They sign an appointment letter, including an agreement of non-disclosure/confidentiality and conflict of interest before beginning their work. These rules must be adhered to at all times, before, during and after the evaluation.

Conflicts of interest: Under the terms of their appointment letter, experts must disclose beforehand any known conflicts of interest, and must immediately inform an REA staff member if one becomes apparent during the course of the evaluation. The REA will take whatever action is necessary to remove any conflict.

Non-disclosure/Confidentiality: The appointment letter also requires experts to maintain strict confidentiality with respect to the whole evaluation process. They must follow any instruction given by the REA to ensure this. Under no circumstance may an expert attempt to contact an applicant on his/her own account, either during the evaluation or afterwards.

In addition, independent observers will be appointed by the REA to observe the evaluation process from the point of view of its working and execution. The role of the observer is to give independent advice to the REA on the conduct and fairness of the evaluation sessions, as well as on possible improvements to the evaluation procedures. The observer will not express views on the proposals under examination or the opinions of the experts on the proposals.

2. Before the evaluation

On receipt by the REA, proposals are registered and acknowledged and their contents entered into a database to support the evaluation process. Eligibility criteria for each proposal are checked before the evaluation begins. Proposals which do not fulfil these criteria will not be included in the evaluation. For this call a proposal will only be considered eligible if it meets all of the following conditions:

- It is received by the REA before the deadline given in the call fiche;
- It is complete (i.e. both the requested administrative forms and the proposal description are present);
- The other eligibility conditions described above, for example the rule for mobility, are satisfied.

Where a maximum number of pages have been indicated for a section of the proposal, or for the proposal as a whole, the experts will be instructed to disregard any excess pages.

³ Rules for proposal submission of proposal, and the related evaluation selection and award procedures, available on the Participant Portal.

The REA establishes a list of experts capable of evaluating the proposals that have been received. The list is drawn up to ensure:

- A high level of expertise
- An appropriate range of competencies.

Provided that the above conditions can be satisfied, other factors are also taken into consideration:

- An appropriate balance between academic and industrial expertise and users
- A reasonable gender balance
- A reasonable distribution of geographical origin
- Regular rotation of experts.

In constructing the lists of experts, the REA also takes account of their abilities to appreciate the industrial and/or societal dimension of the proposed work. Experts must also have the appropriate language skills required for the proposals to be evaluated.

REA staff allocate proposals to individual experts, taking account of the fields of expertise of the experts, and avoiding conflicts of interest.

3. Individual evaluation of proposals

At the beginning of the evaluation, experts will be briefed by REA staff, covering the evaluation procedure, the experts' responsibilities, the issues involved in the particular area/objective, and other relevant material.

Each proposal will first be assessed independently by at least three experts, chosen by the REA from the pool of experts taking part in this evaluation, against the following criteria:

S&T Quality (award) Threshold 3. Weighting 25%	Training (award) Threshold 3. Weighting 15%	Researcher (award) Threshold 4. Weighting 25%	Implementation (selection) Weighting 15% appropriate between the 3rd country institution and the European host	Impact (award) Threshold 3.5. Weighting 20%
Research/technological quality, including any interdisciplinary and multidisciplinary aspects of the proposal	Clarity and quality of the research training objectives for the researcher	Research experience**	Quality of infrastructure / facilities and International collaborations of host (outgoing and return host)	Impact of competencies acquired during the fellowship on the future career prospects of the researcher, in particular through exposure to transferable skills training *
Appropriateness of research methodology and approach	Relevance and quality of additional research training, as well as transferable skills offered *	Research results including patents, publications, teaching etc., taking into account the level of experience	Practical arrangements for the implementation and management of the research project (outgoing and return host) *	Contribution to career development, or re-establishment where relevant. *
Originality and innovative nature of the project and relationship to the 'state of the art' of research in the field	Host expertise in training experienced researchers in the field and capacity to provide mentoring/tutoring (outgoing and return host) *	Independent thinking and leadership qualities	Feasibility and credibility of the project, including work plan	Potential for creating long term collaborations and mutually beneficial co-operation between Europe and the other third country
Timeliness and relevance of the project		Match between the fellow's profile and project.	Practical and administrative arrangements, and support for the hosting of the fellow (outgoing and return host) *	Contribution to European excellence and European competitiveness through valuable transfer of knowledge during the return phase
Host research expertise in the field (outgoing and return host)		Potential for reaching a position of professional maturity*		Impact of the proposed outreach activities *
Quality of the group/scientist in charge (outgoing and return host)		Potential to acquire new knowledge		

* Sub-criteria to be evaluated in the light of the principles of the 'European Charter for Researchers' and the 'Code of Conduct for the Recruitment of Researchers' http://ec.europa.eu/eracareers/pdf/am509774CEE_EN_E4.pdf.

**Any leave of absence in the research career of more than one year such as maternity/parental leave, sick or family care leave, military service, humanitarian aid work, etc. will be taken into account.

Evaluation scores will be given for each of the five criteria, and not for the sub-criteria. The sub-criteria are issues that the expert should consider in the assessment of the relevant criterion. They also act as reminders of issues to be raised later during the discussions of the proposal.

Each criterion will be scored out of 5. Scores will be given with a resolution of one decimal place. The scores indicate the following with respect to the criterion under examination:

- 0 - The proposal fails to address the criterion under examination or cannot be judged due to missing or incomplete information
- 1 - Poor. The criterion is addressed in an inadequate manner, or there are serious inherent weaknesses.
- 2 - Fair. While the proposal broadly addresses the criterion, there are significant weaknesses.
- 3 - Good. The proposal addresses the criterion well, although improvements would be necessary.
- 4 - Very Good. The proposal addresses the criterion very well, although certain improvements are still possible.
- 5 - Excellent. The proposal successfully addresses all relevant aspects of the criterion in question. Any shortcomings are minor.

The IOF thresholds and weightings for the different criteria are summarized in the table below:

Evaluation Criterion	Weighting (in %)	Threshold	Priority in case of ex aequo
S&T Quality	25	3	3
Training	15	3	2
Researcher	25	4	1
Implementation	15 ⁴	N/A	5
Impact	20	3.5	4

In addition to the individual thresholds for the first three criteria, an overall threshold of 70% will be applied to the total weighted score.

At this first step the experts are acting individually; they do not discuss the proposal with each other, nor with any third party. The experts record their individual opinions in an Individual Assessment Report (IAR), giving scores and also comments against the evaluation criteria.

When scoring proposals, experts will *only* apply the above evaluation criteria.

Experts will assess and mark the proposal exactly as it is described and presented. They do not make any assumptions or interpretations about the project in addition to what is in the proposal.

Concise but explicit justifications will be given for each score. Recommendations for improvements to be discussed as part of a possible negotiation phase will be given to the REA, if needed.

The experts will also indicate whether, in their view, the proposal deals with sensitive ethics issues, please see the Guide for Applicants (Ethics).

Signature of the IAR also entails a declaration that the expert has no conflict of interest in evaluating the particular proposal.

Scope of the call: It is possible that a proposal is found to be completely out of scope of the call during the course of the individual evaluation, and therefore not relevant. If an expert suspects that this may be the case, an REA staff member will be informed immediately, and the views of the other experts will be sought.

⁴ Split where appropriate between the 3rd country institution and the European host.

If the consensus view is that the main part of the proposal is not relevant to the topics of the call, the proposal will be withdrawn from the evaluation, and the proposal will be deemed ineligible.

4. Consensus meeting

Once all the experts to whom a proposal has been assigned have completed their IAR, the evaluation progresses to a consensus assessment, representing their common views. This entails a consensus meeting to discuss the scores awarded and to prepare comments.

The consensus discussion may be moderated by a representative of the REA. The role of the moderator is to seek to arrive at a consensus between the individual views of experts without any prejudice for or against particular proposals or the organisations involved, and to ensure a confidential, fair and equitable evaluation of each proposal according to the required evaluation criteria.

The moderator for the group may designate an expert to be responsible for drafting the consensus report ("Rapporteur"). The experts attempt to agree on a consensus score for each of the criteria that have been evaluated and suitable comments to justify the scores. Comments should be suitable for feedback to the proposal coordinator. Scores and comments are set out in a consensus report. They also come to a common view on the questions of scope and ethics.

If during the consensus discussion it is found to be impossible to bring all the experts to a common point of view on any particular aspect of the proposal, the REA may ask up to three additional experts to examine the proposal.

Ethics issues (above threshold proposals)

If one or more experts have noted that there are ethics issues touched on by the proposal, and the proposal is considered to be above threshold, the relevant box on the consensus report (CR) will be ticked.

The Ethics Issues Report will be signed by an REA moderator and one member of the consensus group (normally, the proposal Rapporteur). Following the evaluation, the REA will submit all proposals in the funding range and for which ethics issues have been flagged (either by the applicant and/or by the experts during the evaluation) to a specific ethics screening. A specific EIR will be filled in by the ethics experts and forwarded to the beneficiaries during the negotiation. Requirements in the report will be regarded as contractual obligations and will have to be fulfilled before the negotiation for a grant agreement can be completed. Furthermore, for projects raising specific ethics issues such as research intervention on human beings; research involving children; research on human embryos and human embryonic stem cells and non-human primates, an in-depth ethics review will be automatically carried out by the Commission services. For more detail please refer to the Guide for Applicants (Ethics).

Outcome of consensus

The outcome of the consensus step is the consensus report. This will be signed (either on paper, or electronically) by all experts, or as a minimum, by the Rapporteur and the moderator. The moderator is responsible for ensuring that the consensus report reflects the consensus reached, expressed in scores and comments. In the case that it is impossible to reach a consensus, the report sets out the majority view of the experts but also records any dissenting views.

The REA will take the necessary steps to ensure the quality of the consensus reports, with particular attention given to clarity, consistency, and appropriate level of detail. If important changes are necessary, the reports will be referred back to the experts concerned.

The signing of the consensus report completes the consensus step.

Evaluation of a resubmitted proposal

In the case of proposals that have been submitted previously to the Commission or the REA, the moderator gives the experts the previous evaluation summary report (see below) only at the consensus stage and after a consensus has been achieved between the experts. The experts will be required to provide a clear justification for their scores and comments should these differ markedly from those awarded to the earlier proposal.

5. Panel review

This is the final step involving the independent experts. It allows them to formulate their recommendations to the REA having had an overview of the results of the consensus step. The main task of the panel is to establish a ranked list of the proposals which passed all evaluation thresholds. The panels are organised according to the research disciplines and comprise experts involved at the consensus step.

The tasks of the panel will also include:

- *reviewing cases where a minority view was recorded in the consensus report*
- *recommending a priority order for proposals with the same consensus score in all subcriteria.*

The panel is moderated by the chair. The REA will ensure fair and equal treatment of the proposals in the panel discussions. A panel Rapporteur will be appointed to draft the panel's advice.

The outcome of the panel meeting is a report recording, principally:

- *An evaluation summary report (ESR) for each proposal, including, where relevant, a report of any ethics issues raised and any security considerations*
- *A list of proposals passing all thresholds, along with a final score for each proposal passing the thresholds and the panel recommendations for priority order*
- *A list of evaluated proposals having failed one or more thresholds*
- *A list of any proposals having been found ineligible during the evaluation by experts*
- *A summary of any deliberations of the panel.*

The panel report is signed by at least three panel experts, including the panel Rapporteur and the chairperson. A further special ethics review of above-threshold proposals may be organised by the REA

Annex 3 – Instructions for completing "part A" of the proposal

Proposals in this call must be submitted electronically, using the REA's Electronic Proposal Submission System.

In part A you will be asked for certain administrative details that will be used in the evaluation and further processing of your proposal. Part A forms an integral part of your proposal. Details of the work you intend to carry out will be described in part B (Annex 4).

Section A1 gives a snapshot of your proposal, section A2 concerns the *host organisation*, section A3 gives details of the researcher, while section A4 deals with financial matters.

How to complete the forms (A1 to A4)?

When you complete part A, please make sure that:

The host institution in the European Union or in an Associated Country is always participant **number one** and the partner institution in an Other Third Country is **number two**. **All fields must be filled.**

Note: The following notes are for information only. They should assist you in completing part A of your proposal. On-line guidance will also be available. The precise questions and options presented on EPSS may differ slightly from these below.

Section A1 – Information on the Proposal	
Proposal number	[pre-filled]
Proposal Acronym	The short title or acronym will be used to identify your proposal efficiently in this call. It should be of <u>no more than 20 characters</u> (use standard alphabet and numbers only; no symbols or special characters please). The same acronym should appear on each page of part B of your proposal.
Proposal Title	The title should be <u>no longer than 200 characters</u> and should be understandable to the non-specialist in your field.
Marie Curie Action code	This field will be pre-filled with the code corresponding to the action of the call: Initial Training Networks (ITN) Industry-Academia Partnerships and Pathways (IAPP) Co-funding of Regional, National and International Programmes (COFUND) Intra-European Fellowships (IEF) Career Integration Grants (CIG) International Outgoing Fellowships (IOF) International Incoming Fellowships (IIF) Marie Curie International Research Staff Exchange Scheme (IRSES)
Evaluation Panel	Please choose a code from the list below indicating the main research area of relevance to your proposal. This information will help the REA in the organisation of the evaluation of proposals. Chemistry CHE Economic Sciences ECO Information science and Engineering ENG Environment and geosciences ENV Life sciences LIF Mathematics MAT Physics PHY Social Sciences and Humanities SOC * To help you select the most relevant panel code please refer also the breakdown of each research area into a number of sub-disciplines at the end of this section.
Total Duration in months	Insert the estimated duration of the project in full months: between 24 and 36 months only.
Call identifier	[pre-filled] The call identifier is the reference number given in the call or part of the call you are addressing, as indicated in the publication of the call in the Official Journal of the European Union, and on the Participant Portal call page. A call identifier looks like this: <i>FP7-PEOPLE-IOF-20XX</i> .
Keywords	Please enter a number of keywords that you consider sufficient to characterise the scope of your proposal. There is a <u>limit of 200 characters</u> . Please select at least two keywords from the drop-down list and/or add free keywords.
Abstract	The abstract should, at a glance, provide the reader with a clear understanding of the objectives of the proposal, how they will be achieved, and their relevance to the Work Programme. This summary will be used as the short description of the proposal in the evaluation process and in communications to the programme management committees and other interested parties. It must therefore be short and precise and should not contain confidential information. Please use plain typed text, avoiding formulae and other special characters. There is a <u>limit of 2000 characters</u> .
Similar proposals	A 'similar' proposal or contract is one that differs from the current one in minor ways.
Ethics Issues in Part B	Please choose YES or NO on the following basis: In the Part B Proposal Description you are asked to describe any ethics issues that may arise in your proposal and to fill in the table "RESEARCH ETHICS ISSUES". If your proposal involves any of the sensitive ethics issues detailed in the table, please choose YES in this field. If not, choose 'NO'. This information will be used by the REA to flag proposals with potential ethics issues that need further follow-up (but not necessarily a formal ethics review).

Evaluation Panels - Sub-disciplines

To help you in selecting the most relevant panel code please find below a breakdown of each research area:

CHEMISTRY (CHE)

- Biological, Pharmaceutical and Medicinal Chemistry
- Environmental Chemistry
- Homogeneous and Heterogeneous Catalysis
- Instrumental Techniques, Analysis, Sensors
- Molecular Aspects of New Materials, Macromolecules, Supramolecular Structures, Nanochemistry
- New Synthesis, Combinatorial Chemistry
- Reaction Mechanisms and Dynamics
- Surface Science and Colloids
- Theoretical and Computational chemistry
- Other Chemistry

ECONOMIC SCIENCES (ECO)

- Financial Sciences
- Industrial Economics (incl. Technology & Innovation)
- International Economics
- Labour Economics
- Macroeconomics
- Management of Enterprises (incl. Marketing)
- Microeconomics
- Natural Resources & Environmental Economics
- Public Sector Economics
- Quantitative Methods
- Research Management
- Social Economics
- Urban & Regional Economics (incl. Transport Economics)
- Other Economic Sciences

ENGINEERING & INFORMATION SCIENCE (ENG)

- Automation, Computer Hardware, Robotics
- Bioengineering
- Chemical Engineering
- Civil Engineering
- Computer Graphics, Human Computer Interaction, Multimedia
- Electrical Engineering
- Electronics
- Information Systems, Software Development and Databases
- Knowledge Engineering and Artificial Intelligence
- Materials Engineering
- Mechanical Engineering
- Parallel and Distributed Computing, Computer Architecture
- Signals, Speech and Image Processing
- Systems, Control, Modelling & Neural Networks
- Telecommunications
- Transport Engineering
- Other Engineering and Information Science

ENVIRONMENT & GEOSCIENCES (ENV)

- Agriculture, Agro industry and Forestry
- Biodiversity and Conservation
- Climatology, Climate Change, Meteorology and Atmospheric Processes
- Ecology and Evolution (incl. Population Biology)
- Environmental Engineering and Geotechnics
- Fisheries and Aquaculture
- Geochemistry and Mineral Sciences
- Geophysics, Tectonics, Seismology, Volcanology
- Marine Sciences
- Natural Resources Exploration and Exploitation
- Physical Geography, Earth Observation and Remote Sensing
- Pollution, Waste Disposal and Ecotoxicology
- Soil and Water Processes
- Stratigraphy, Sedimentary Processes and Palaeontology
- Other Environment and Geosciences

LIFE SCIENCES (LIF)

- Bioenergetics

- Biological Membranes
- Biomedicine, Public Health & Epidemiology
- Cancer Research
- Cell Biology
- Computational Biology and Bioinformatics
- Developmental Biology
- Enzymology
- Genetic Engineering
- Genomics and General Genetics
- Immunology
- Macromolecular Structures and Molecular Biophysics
- Medical Pathology
- Metabolic Regulation and Signal Transduction
- Metabolism of Cellular Macromolecules
- Microbiology and Parasitology
- Neurosciences (incl. Psychiatry and Clinical Psychology)
- Pharmacology and Toxicology
- Physiology
- Virology
- Other Life Sciences

MATHEMATICS (MAT)

- Algebra and Number Theory
- Algorithms and Complexity
- Analysis and Partial Differential Equations
- Applied Mathematics and Mathematical Physics
- Discrete Mathematics and Computational Mathematics
- Geometry and Topology
- Logic and Semantics
- Statistics and Probability
- Other Mathematics

PHYSICS (PHY)

- Astronomy, Astrophysics and Cosmology
- Atomic and Molecular Physics
- Biophysics and Medical Physics
- Condensed Matter- Electronic Structures, Electrical and Magnetic Properties
- Condensed Matter- Mechanical and Thermal Properties
- Condensed Matter- Optical and Dielectric Properties
- Elementary Particles and Fields
- Fluids and Gases
- Non Linear Dynamics and Chaos Theory
- Nuclear Physics
- Optics and Electromagnetism
- Physical Chemistry, Soft Matter and Polymer Physics
- Physics of Superconductors
- Plasmas and Electric Discharges
- Statistical Physics and Thermodynamics
- Surface Physics
- Other Physics

SOCIAL SCIENCES AND HUMANITIES (SOC)

- Education and Training
- Law (European or Comparative National)
- Linguistics (applied to: Education, Industrial Efficiency or Social Cohesion)
- Media and Mass Communication
- Political Sciences (European or Comparative National)
- Psychology (Social, Industrial, Labour, or Education)
- Sociology
- Other Social and Human Sciences

Section A2 – Information on the Host organisations:	
Participant number	The number allocated to the participant for this proposal. In proposals with only one participant, the single participant is always number one. In proposals that have several participants, the co-ordinator of a proposal is always number one. The host institution in the European Union or in an Associated Country is always participant number one and the partner institution in an Other Third Country is number two
Participant identification code	The Participant Identification Code (PIC) will enable organisations to take advantage of the Unique Registration Facility. Organisations who have received a PIC from the REA are encouraged to use it when submitting proposals. Check the following web link to retrieve your PIC number (https://ec.europa.eu/research/participants/portal/page/searchorganisations). By entering a PIC, parts of section A2 will be filled in automatically.
Legal name	For a Public Law Body , it is the name under which your organisation is registered in the Resolution text, Law, Decree/Decision establishing the Public Entity, or in any other document established at the constitution of the Public Law Body; For a Private Law Body , it is the name under which your organisation is registered in the national Official Journal (or equivalent) or in the national company register. For a natural person , it is e.g. Mr Adam JOHNSON, Mrs Anna KUZARA, Ms Alicia DUPONT
Organisation Short Name	Choose an abbreviation of your Organisation Legal Name only for use in this proposal and in all related documents. This short name should not be more <u>than 20 characters</u> exclusive of special characters e.g. CNRS and not C.N.R.S. It should preferably be the one commonly used, e.g. IBM and not Int.Bus.Mac.
Legal address	For Public and Private Law Bodies, it is the address of the entity's Head Office. For Natural Persons it is the Official Address. If your address is specified by an indicator of location other than a street name and number, please insert this instead under the "street name" field and "N/A" under the "number" field.
Non-profit organisation	Non-profit organisation is a legal entity qualified as such when it is recognised by national or, international law.
Public body	Public body means any legal entity established as such by national law
Research organisation	Research organisation means a legal entity established as a non-profit organisation which carries out research or technological development as one of its main objectives.
Higher or secondary education establishment	A secondary and higher education establishment means organisations only or mainly established for higher education/training (e. g. universities, colleges, etc.).
International Organisation	"International Organisation" means an intergovernmental organisation, other than the European Union, which has legal personality under international public law, as well as any specialised agency set up by such an international organisation;
International European Interest Organisation	"International European Interest Organisation" means an international organisation, the majority of whose members are Member States or Associated Countries, and whose principal objective is to promote scientific and technological cooperation in Europe;
Joint Research Centre of the European Commission	The European Commission's Joint Research Centre
Entity composed of one or more legal entities	European Economic Interest Groups, Joint Research Units (Unités Mixtes de Recherche), Enterprise Groupings (Commission Decision DL/2003/3188 of 27.11.2003).

Commercial Enterprise	Organisations operating on a commercial basis, i.e. companies gaining the majority of their revenue through competitive means with exposure to commercial markets, including incubators, start-ups and spin-offs, venture capital companies, etc.
NACE code	NACE means " <u>N</u> omenclature des <u>A</u> ctivités économiques dans la <u>C</u> ommunauté <u>E</u> uropéenne". Please select one activity from the list that best describes your professional and economic ventures. If you are involved in more than one economic activity, please select the one activity that is most relevant in the context of your contribution to the proposed project. For more information on the methodology, structure and full content of NACE (rev. 1.1) classification please consult EUROSTAT at: http://ec.europa.eu/eurostat/ramon/nomenclatures/index.cfm?TargetUrl=LST_CLS_DLD&StrNom=NACE_1_1&StrLanguageCode=EN&StrLayoutCode=HIERARCHIC .
Small and Medium-Sized Enterprises (SMEs)	SMEs are micro, small and medium-sized enterprises within the meaning of Recommendation 2003/361/EC in the version of 6 May 2003. The full definition and a guidance booklet can be found at http://ec.europa.eu/enterprise/enterprise_policy/sme_definition/index_en.htm To find out if your organisation corresponds to the definition of an SME you can use the on-line tool at http://ec.europa.eu/research/sme-techweb/index_en.cfm
Contact point	It is the main researcher or team leader in charge of the proposal for the participant. For participant number 1 (the coordinator), this will be the person the REA will contact concerning this proposal (e.g. for additional information, invitation to hearings, sending of evaluation results, convocation to negotiations).
Authorised representative to sign the grant agreement or to commit the organisation for this proposal	Please indicate the contact details of the person in the Host Organisation who would be authorised to sign the <i>grant agreement</i> with the REA if the proposal is selected for funding.
Title	Please choose one of the following: Prof., Dr., Mr., Mrs., Ms.
Sex	This information is required for statistical and mailing purposes. Indicate Female or Male as appropriate.
Phone and fax numbers	Please insert the full numbers including country and city/area code. Example +32-2-2991111.

Section A3 – Information on the Researcher:	
Location of origin (country)	The country in which the location of origin is situated (see below). Insert the name of the country as commonly used.
Location of origin (town)	The place where the <i>experienced researcher</i> is residing or carrying out his/her main activity at the relevant deadline for proposals submission.
Contact address	Fill in only the fields forming your complete postal address where you will be residing up to the deadline. If your address is specified by an indicator of location other than a street name and number, please insert this instead under the "street name" field and "N/A" under the "number" field. Please make sure that the email address given will still be valid for at least a year after the deadline.
University degree	Date of award of a degree which entitles the holder to embark on doctoral studies in the country in which the degree was obtained or in the host country, without having to acquire any further qualifications. Wrong or missing information may cause your proposal to be ineligible.
Doctorate expected before the deadline	If you do not yet have a doctoral degree and expect to have it before the deadline, please indicate the expected date of award. Researchers must have obtained a doctoral degree at the latest on the date of the relevant deadline for submission of proposals or have at least 4 years of research experience after obtaining the university degree giving access to a doctorate on the date of the relevant deadline for submission of proposals. Wrong or missing information may cause your proposal to be ineligible.
Doctorate	Please specify the date of award of a doctoral degree using the format (DD/MM/YYYY). Wrong or missing information may cause your proposal to be ineligible.
Full-time postgraduate research experience	The information provided in this field should reflect the researcher's full-time post graduate research experience at the time of the relevant deadline for submission of the proposal. Post-graduate refers to a degree which entitles the holder to embark on doctoral studies without having to acquire any further qualifications. Only time spent on post graduate research activities (whether remunerated or not, and including the period of research training e.g. PhD period) should be included. If an applicant has been engaged in other professional activities than research in certain periods since his/her graduation, this time will not count as 'full-time post graduate research experience'. Any periods of part-time activity in research should be translated into full-time experience (e.g. 3 years half time = 1,5 years full-time). Please note that the proposer may be asked to produce evidence of this experience at any stage. Wrong or missing information may cause your proposal to be ineligible.
Place of activity/place of residence (previous 5 years)	Indicate the period(s) and the country/countries in which you have legally resided and/or had your main activity (work, studies...) during the last 5 years up until the deadline for the submission of the proposal. <u>The 5 years prior to the deadline must be covered.</u> Wrong or missing information may cause your proposal to be ineligible. Any additional information you wish to make known to the evaluators should be included in the Part B (proposal description/CV).
Period	Indicate the starting date and the end date of each period using the format: DD/MM/YYYY, starting with the most recent period. The first date must be the call deadline. <u>There must be no gaps between the periods.</u>
Have you submitted or are you in the process of submitting another proposal for Marie Curie actions IEF, IOF, or IIF or have you previously benefited from Community funding under Marie Curie actions?	<p>Each researcher may only submit one proposal at a time for the following actions:</p> <ul style="list-style-type: none"> • Marie Curie Intra-European Fellowships (IEF), • Marie Curie Outgoing International Fellowships (IOF), • Marie Curie Incoming International Fellowships (IIF), <p>Having several proposals in the application procedure for one or more actions at the same time may render your proposal ineligible. New or similar proposals are eligible to be submitted only after the evaluation procedure of the relevant round has been terminated.</p> <p>Please note that the Research Executive Agency will not conclude another <i>grant agreement</i> for the same project.</p> <p>If you have previously benefited from Community funding under Marie Curie actions in the same field, you should demonstrate (in part B) the substantial added value of the new project. Indicate here the action name, year and the proposal or contract number.</p>

Section A4 – Funding Request IOF	
Type B Fixed-amount fellowship (Y/N)	<p>As a general rule, the host organisation should recruit the researcher under an employment contract/fellowship with full social security coverage (Type A). A fixed-amount fellowship with minimum social security (Type B) is foreseen for very exceptional cases. Please note that in this case the allowance for the researcher will be lower. More information concerning the choice can be found in Annex 3 of the Work Programme.</p> <p>At the submission stage, Type A is set as the only possible option. If needed, the possibility of a Type B Fixed-amount fellowship will have to be discussed at a later stage, during negotiation, for successful applicants.</p>
Mobility allowance	<p>Family related mobility allowance refers to a researcher with a spouse and/or children. Please see the definition in Annex 3 of the Work Programme. The reference date for family situation is the relevant deadline for submission of proposals.</p> <p>Please indicate your eligibility status by inserting YES or NO in the boxes.</p>
Post-graduate Research Experience of the applicant	<p>Please choose between the 3 categories to indicate the full-time research experience of the applicant at the deadline of the call: less than 4 years (<4 years), from 4 up to 10 years (4-10 years), or more than 10 years (>10 years).</p>

Annex 4 – Instructions for drafting "Part B" of the proposal

A description of this action is given in section 2 of this Guide for Applicants. Please examine this carefully before preparing your proposal.

This annex provides a template to help you structure your proposal. It will help you present important aspects of your planned work in a way that will enable the experts to make an effective assessment against the evaluation criteria (see Annex 2).

The **maximum length** of part B is **27 pages** (excluding table of contents; the ethics issues section as well as start and end pages). In addition **there are limits applied separately to most sections**, see below. The experts will be instructed to disregard any pages exceeding these limits. Annexes are not allowed.

The minimum font size allowed is 11pt with single line spacing. The page size is A4, and all margins should be at least 15mm (not including any headers or footers).

Please make sure that:

- You use the correct template to prepare your proposal;
- You respect the maximum number of pages. The REA reserves the right to disregard parts of a proposal that exceed the maximum lengths specified along with any attachments/additional information provided to the proposal;
- Part B of your proposal carries the proposal acronym as a header to each page and that all pages are numbered in a single series on the footer of the page to prevent errors during handling. It is recommended that the numbering format "Part B - Page X of Y" is used;
- Your proposal is complete. Incomplete proposals are not eligible and will not be evaluated.

STARTPAGE

PEOPLE MARIE CURIE ACTIONS

Marie Curie International Outgoing Fellowships (IOF) Call: FP7-PEOPLE-2012-IOF

PART B

“PROPOSAL ACRONYM”

Part B – Table of Contents of Proposals

To draft PART B of proposals applicants should take into account the following structure and subheadings. If required for an adequate description of their project, applicants may wish to add further headings.

B1 RESEARCH AND TECHNOLOGICAL QUALITY (MAXIMUM 8 PAGES)

- Research and technological quality, including any interdisciplinary and multidisciplinary aspects of the proposal
- Appropriateness of research methodology and approach
- Originality and Innovative nature of the project, and relationship to the 'state of the art' of research in the field
- Timeliness and relevance of the project
- Host research expertise in the field (outgoing and return host)
- Quality of the group/scientist in charge (outgoing and return host)

B2 TRAINING (MAXIMUM 2 PAGES)

- Clarity and quality of the research training objectives for the researcher
- Relevance and quality of additional research training, as well as transferable skills offered
- Host expertise in training *experienced researchers* in the field and capacity to provide mentoring/tutoring (outgoing and return host)

B3 RESEARCHER (MAXIMUM 7 PAGES WHICH INCLUDES A CV AND A LIST OF MAIN ACHIEVEMENTS)

- Research experience
- Research results including patents, publications, teaching etc., taking into account the level of experience
- Independent thinking and leadership qualities
- Match between the fellow's profile and project
- Potential for reaching a position of professional maturity
- Potential to acquire new knowledge

B4 IMPLEMENTATION (MAXIMUM 6 PAGES)

- Quality of infrastructure / facilities and international collaborations of host (outgoing and return host)
- Practical arrangements for the implementation and management of the research project (outgoing and return host)
- Feasibility and credibility of the project, including work plan
- Practical and administrative arrangements, and support for the hosting of the fellow (outgoing and return host)

B5 IMPACT (MAXIMUM 4 PAGES)

- Impact of competencies acquired during the fellowship on the future career prospects of the researcher, in particular through exposure to transferable skills training
- Contribution to career development or re-establishment, where relevant
- Potential for creating long term collaborations and mutually beneficial co-operation between Europe and the Other Third Country
- Contribution to European excellence and European competitiveness through valuable transfer of knowledge during the return phase
- Impact of the proposed outreach activities

B6 ETHICS ISSUES (NO PAGE LIMIT)

B1 RESEARCH AND TECHNOLOGICAL QUALITY (maximum 8 pages)

Research and technological Quality, including any interdisciplinary and multidisciplinary aspects of the proposal

Give a clear description of the state-of-the-art of the research topic. Provide a clear and specific description of the research objectives against the background of the state of the art, and the results hoped for. The most relevant bibliographical references should be provided, and must be included in the overall page count. If relevant, provide information on interdisciplinary / multidisciplinary and/or inter-sectoral aspects of the proposal.

Appropriateness of research methodology and approach

For each objective explain the methodological approach that will be employed in the project and justify it in relation to the overall project objectives. Describe any relevant techniques, methods or analyses that will be applied.

Originality and innovative nature of the project, and relationship to the 'state of the art' of research in the field

Explain the contribution that the project is expected to make to advance the state-of-the-art within the project field. Describe any novel concepts, approaches or methods that will be employed.

Timeliness and relevance of the project

Describe the appropriateness of the research proposed against the state of the art and why it is timely. Outline the benefit that will be gained from undertaking the project at European Research Area (ERA) level and how the fellowship will contribute to enhance ERA research excellence and reintegrate the researcher. Describe the scientific, technological, socio-economic or other reasons for carrying out further research in the field covered by the project.

Host research expertise in the field (outgoing and return host)

The host institution (outgoing and return hosts) must explain its level of experience on the research topic proposed and document its track record of work, including the main international collaborations. Information provided should include participation in projects, publications, patents and any other relevant results.

Quality of the group/scientist in charge (outgoing and return host)

Similar information as above should be provided for the *scientist in charge* of the supervision of the project (outgoing and return hosts). Where relevant, show that any gender issues associated to the proposal have been adequately taken into account. The host institution (outgoing) must demonstrate its track record of previous training achievements especially at an advanced level within the field of research. The host institution (return) must demonstrate its track record of previous research achievements especially at an advanced level within the field of research.

B2 TRAINING (maximum 2 pages)

Clarity and quality of the research training objectives for the researcher

State the training objectives and explain in detail how these can be beneficial for the (further) development of an independent research career.

Relevance and quality of additional research training, as well as transferable skills offered

Explain how the training provided will contribute to diversifying/broadening the competencies of the researcher, and how this will influence the *researcher's* career development. Outline complementary training and skills expected during the execution of the project (such as research management, presentation skills, ethics, etc.).

Host expertise in training experienced researchers in the field and capacity to provide mentoring/tutoring (outgoing and return host)

Give a short outline of the host's (Outgoing) capacity for training, and which measures the host (Outgoing and return) will undertake for training, mentoring/tutoring the researcher.

B3 RESEARCHER (maximum 7 pages which includes a CV and a list of main achievements)**Research experience**

The applicant must present a comprehensive description of his/her research experience. A scientific/professional CV must be provided and should mention explicitly:

- academic achievements
- list of other professional activities
- any other relevant information.

Any leave of absence in the research career of more than one year such as maternity/parental leave, sick or family care leave, military service, humanitarian aid work, etc. should be detailed and justified.

Research results including patents, publications, teaching etc., taking into account the level of experience

Outline the major achievements of the researcher. These may also include results in the form of funded projects, publications, patents, reports, invited participation in conferences etc., taking into account the level of experience. To help the expert evaluators better understand the level of skills and experience it is advisable to write a short description (around 250 words) of the major accomplishments mentioning the purpose, results, skills acquired, derived applications etc.

Independent thinking and leadership qualities

Describe the activities that reflect initiative, independent thinking, project management skills and leadership. Describe the potential that the researcher has for increasing and reinforcing these qualities.

Match between the fellow's profile and project

Show that the applicant's skills and experience are suitable for the project proposed.

Potential for reaching a position of professional maturity

Describe the potential of the researcher to reach professional maturity.

Potential to acquire new knowledge

Describe the researcher's ability to acquire new knowledge and skills.

B4 IMPLEMENTATION (maximum 6 pages)

Quality of infrastructure / facilities and international collaboration of host (outgoing and return host)

The proposal must explain the level of experience of the outgoing host institution on the research topic proposed, including all international collaborations (outgoing and return host). Information provided should include participation in projects, publications, patents and any other relevant results. The facilities available in both the outgoing and returning host and their adequacy to the research project should be mentioned.

Information on the capacity to provide training in complementary skills that can further aid the *fellow* in the reintegration period should be included. The host needs to specify what are the infrastructures available and whether these can respond to the needs set by the execution of the project.

The European return host's qualities and capabilities to absorb and make use of the experience gained by the returning *fellow* should be described.

Practical arrangements for the implementation and management of the project (outgoing and return host)

The applicant and the host institutions for both phases (outgoing and return) must be able to provide information on how the implementation and management of the fellowship will be achieved. The expert evaluators will examine the practical arrangements that can have an impact on the feasibility and credibility of the project.

Feasibility and credibility of the project, including work plan

Provide a detailed work plan that includes the objectives and milestones that can help assess the progress of the project. Mention the arrangements made in terms of supporting the reintegration phase of the *fellow* providing a career development plan where applicable. Where appropriate, describe the approach to be taken regarding the intellectual property that may arise from the research project.

Practical and administrative arrangements and, support for the hosting of the fellow (outgoing and return host)

The host of the outgoing phase should describe what practical arrangements are in place to host a researcher coming from another country. What support will be given to him/her to settle into their new host country (in terms of language teaching, help with local administration, obtaining of permits, accommodation, schools, childcare etc.). The host of the return phase should explain which measures are planned for the successful re-integration of the researcher.

B5 IMPACT (maximum 4 pages)

Impact of competencies acquired during the fellowship on the future career prospects of the researcher, in particular through exposure to transferable skills training

Describe what impact the acquired (complementary) competencies and skills during the fellowship will have on the future career prospects of the researcher. Explain how the newly acquired skills and knowledge will be transferred from the *Other Third Country* to the return host.

Contribution to career development or re-establishment where relevant

How will the fellowship contribute in the medium- and long-term to the development of the *fellow's* career? In the case of a *fellow* returning to research, how will his/her re-establishment be helped by the fellowship?

Potential for creating long term collaborations and mutually beneficial co-operation between Europe and the *Other Third Country*

What is the likelihood of continuing the collaboration between the two hosts after the end of the fellowship?

Contribution to European excellence and European competitiveness through valuable transfer of knowledge during the return phase

Describe the extent to which the project will increase the attractiveness of the European Research Area for researchers, increase ERA competitiveness and produce long-term synergies and/or structuring effects.

Impact of the proposed outreach activities

Describe the outreach activities of the proposal to be implemented by the researcher during the project duration (for examples, see box on Outreach Activities below).

Outreach Activities within Marie Curie Projects

Outreach Activities are dissemination initiatives directed at the general public. The primary goal is to create awareness of the importance of research to society and to raise awareness of Marie Curie Actions. Each applicant is invited to submit an Outreach Activities Plan as part of his/her proposal. The type of outreach activities is freely chosen by the applicant and could range from press articles to exposing students from primary and secondary schools or universities to science, research and innovation in order to develop their motivation to embrace research careers.

Outreach activities and their impact are taken into account during the evaluation of proposals in the light of the principles of the 'European Charter for Researchers' and 'Code of Conduct for the Recruitment of Researchers'. The relevant principle in the Charter is:

"Public engagement – *Researchers should ensure that their research activities are made known to society at large in such a way that they can be understood by non-specialists, thereby improving the public's understanding of science. Direct engagement with the public will help researchers to better understand public interest in priorities for science and technology and also the public's concerns.*"

Possible outreach activities:

- **Marie Curie Ambassador:** Marie Curie fellows visit schools, universities, community organisations, etc. and promote their research field; Marie Curie fellows – "Ambassadors" – assist teachers in preparing and delivering teaching materials.
- **Workshop Day:** A Marie Curie project runs a workshop/activity day in areas related to the raising of scientific awareness, for school/university students.
- **Summer-School Week:** Students spend one week in a summer school where they receive a first hand experience from the Marie Curie fellows about their current research activities or wider scientific issues; the Marie Curie fellows prepare specific activities, lectures and experiments.
- **Marie Curie Project Open Day:** Students and the general public visit the research institutions or labs and receive a first hand experience or lectures.
- **Public talks, TV-Talks, podcasts and articles in Newspapers:** Marie Curie fellows give a public talk/TV interview or write an article in the local newspaper about the results of the project and how these results could be relevant to the general public.
- **e-Newsletters:** Marie Curie fellows develop a web-based document to be released on the internet for the attention of the public at large (e.g. Wikipedia).

Multimedia releases: Marie Curie fellows make video-clips to be released on the internet, in spaces open to the public at large.

B6 ETHICS ISSUES (No page limit)

Describe any ethics issues that may arise in the proposal. In particular, you should explain the benefit and burden of the experiments and the effects these may have on the research subject. This should be done in conjunction with the information provided in Guide for Applicants, Marie Curie Actions (Ethics).

For **all** proposals the following table must be completed.

ETHICS ISSUES TABLE

(Note: Research involving activities marked with an asterisk * in the left column in the table below will be referred automatically to Ethics Review)

Research on Human Embryo/ Foetus		YES	Page
*	Does the proposed research involve human Embryos?		
*	Does the proposed research involve human Foetal Tissues/ Cells?		
*	Does the proposed research involve human Embryonic Stem Cells (hESCs)?		
*	Does the proposed research on human Embryonic Stem Cells involve cells in culture?		
*	Does the proposed research on Human Embryonic Stem Cells involve the derivation of cells from Embryos?		
	I CONFIRM THAT NONE OF THE ABOVE ISSUES APPLY TO MY PROPOSAL		

Research on Humans		YES	Page
*	Does the proposed research involve children?		
*	Does the proposed research involve patients?		
*	Does the proposed research involve people not able to give consent?		
*	Does the proposed research involve adult healthy volunteers?		
	Does the proposed research involve Human genetic material?		
	Does the proposed research involve Human biological samples?		
	Does the proposed research involve Human data collection?		
	I CONFIRM THAT NONE OF THE ABOVE ISSUES APPLY TO MY PROPOSAL		

Privacy		YES	Page
	Does the proposed research involve processing of genetic information or personal data (e.g. health, sexual lifestyle, ethnicity, political opinion, religious or philosophical conviction)?		
	Does the proposed research involve tracking the location or observation of people?		
	I CONFIRM THAT NONE OF THE ABOVE ISSUES APPLY TO MY PROPOSAL		

Research on Animals		YES	Page
	Does the proposed research involve research on animals?		
	Are those animals transgenic small laboratory animals?		
	Are those animals transgenic farm animals?		
*	Are those animals non-human primates?		
	Are those animals cloned farm animals?		
	I CONFIRM THAT NONE OF THE ABOVE ISSUES APPLY TO MY PROPOSAL		

Research Involving Developing Countries		YES	Page
	Does the proposed research involve the use of local resources (genetic, animal, plant, etc)?		
	Is the proposed research of benefit to local communities (e.g. capacity building, access to healthcare, education, etc)?		

	I CONFIRM THAT NONE OF THE ABOVE ISSUES APPLY TO MY PROPOSAL		
--	--	--	--

	Dual Use	YES	Page
	Research having direct military use		
	Research having the potential for terrorist abuse		
	I CONFIRM THAT NONE OF THE ABOVE ISSUES APPLY TO MY PROPOSAL
