07815684182

**CONGRATULATIONS to all our recruiting centers!**

**Recruitment:** We have just 4 months to go before recruitment ends 30<sup>th</sup> June 2020.

We are now open at **50 sites** and have recruited **over 220 patients** in the study! **This is 62% of our total recruitment target!**

Not all open sites are recruiting yet. If you have not yet started recruitment and would like to, please get in touch. **We are confident we will reach our target in June 2020, and we will keep recruiting even if we reach target.** We are excited and we hope you are too!

**Data Collection:** The primary outcome, **implant loss** at 3 months, is now due for many patients.

**Thank you very much for completing the 3 months CRF in a timely manner.**

This is important as we will be doing our first planned data analysis when we have primary outcome data on 125 patients and we are almost there with 105 so far.

**Data completeness** of both the **baseline/operative** and the **3 month CRFs** is also key. As a reminder, we are allowing an extra month for the 3 months data collection timepoint (4 months deadline).

**Surgeon Interviews:** Have you modified your patient selection criteria or surgical technique? Have you changed your practice as a result of a complication? **We want to hear from you!**

Please **include a contact e-mail address in the CRF** if you are happy to be contacted for a brief telephone interview. We appreciate you fitting us into your busy schedules.

**Well done to all of you!**

**Thanks for all your hard work!**

PreBRA Recruitment to March 09 2020
