

Postgraduate Admissions Statement

PhD Robotics and Autonomous Systems - FARSCOPE (Centre for Doctoral Training)

Programmes Covered

This admissions statement applies to the following programme(s):

PhD Robotics and Autonomous Systems

This programme is jointly delivered by the University of Bristol and the University of the West of England.

Applicants should also refer to the relevant prospectus entry for further programme details.

This admissions statement should be read in association with the [University Admissions Principles and Procedures for Postgraduate Research Programmes](#).

Admissions cycle

This Admissions Statement applies to applications submitted for entry to the programme between 1st October 2018 and 30th September 2019.

Application deadline

Details of application deadlines for this programme are displayed on the individual programme page within the [University course finder](#).

Admissions criteria

Academic requirements

Applicants must hold/achieve a minimum of an upper second-class honours degree in an engineering, physics, mathematics or related subject. Other disciplines will be considered on a case-by-case basis.

Students who have completed the University of Bristol MSc Robotics programme may be considered for direct entry into the second year of the FARSCOPE programme. Admission is subject to interview, including a qualifying presentation on research.

For information on international equivalent qualifications, please refer to our [International Office website](#).

English language requirements for non-native English speakers

For applicants whose first language is not English, and whose full undergraduate degree was not taught in an English-speaking country, it is necessary to hold/achieve a minimum score in an approved English language test as specified in Profile E of the [University's English Language Requirements Policy](#).

Applicants do not need to have reached the required level of English language before applying. If necessary, English language will be included as a condition of offer.

Applicants have the option to undertake one of the University's Pre-sessional English courses. You can find information about the University of Bristol's Pre-Sessional English courses at the [Centre for English Language and Foundation Studies website](#).

Additional requirements

There are no additional requirements for this programme.

Application process

Online application form

Applicants should complete the online application form, uploading all required documents directly into the application form. Guidance on uploading documents can be found in the [Guidance for online applications](#). Any paper documents received by post, or electronic documents received by email, will not be considered except in exceptional circumstances.

Applicants should make every effort to choose the correct programme in the application form by reading the prospectus entry and admissions statements fully. Applicants should contact came-pgr-admissions@bristol.ac.uk if clarification is required.

Documents required

The required documents for this programme are listed below. Applications may not be considered until all required documents have been uploaded to the application form.

Applicants who have already submitted an application can upload additional documents into the 'Post-submission uploads' section of the application form. Information about how to upload documents to an application form can be found in our [Guidance for online applications](#).

- **Two academic references (minimum):** References should be submitted electronically by the referee, using the online reference form. Alternatively, scanned copies of the original reference document(s) can be uploaded by the applicant.

If you graduated more than two years ago, or if professional experience is relevant to the application, professional references will be accepted in lieu of one academic reference. At least one referee should be familiar with the applicant's academic work. References must be written, signed and dated on official letter headed paper from the referee's organisation. They must include the referee's full contact details, i.e. postal address, telephone number and organisation email address. A [reference template](#) is available to show the required format.

References supplied with a personal contact email address will not be accepted unless under exceptional circumstances, which must be explained within the reference. All references must be dated within the last two years.

- **Degree certificate(s)** from first and subsequent degrees. We require colour scans of original documents and certified translations of documents issued in any language other than English.
- **Academic transcripts** from first and subsequent degrees. We require colour scans of original documents and certified translations of documents issued in any language other than English. Transcripts must list all subjects taken and grades achieved to date, with the grade scale clearly displayed in the transcript. Applicants must clearly state their current average grade in the online application form.
- **Personal statement.** The personal statement should include details of your academic background and any relevant experience and/or skills. You should also demonstrate your motivation for undertaking robotics and multidisciplinary research, as well as breadth of interest within the field of robotics and autonomous systems.
- **English language certificates** are required from applicants for whom English is not the native language and whose full undergraduate degree was not taught in an English-speaking country (please see the English Language Requirements for a list of English-speaking countries).

Optional documents for this programme are:

- **Curriculum Vitae (CV):** A CV is not required but can clarify an application. CVs might include details of other relevant qualifications to support an application. Please do not include any school (pre-university) certificates, unless otherwise specified above.
- **Additional References:** Applicants are welcome to upload additional references to further support an application. Professional references from work experience in a related field and/or industrial placements can help an application.
- **Research Training Statement:** A Research Training Statement is not required, but applicants are welcome to provide details of any training requirements to support their postgraduate studies. If there are no training requirements this section can be left blank.

Correspondence with applicants

Applicants will normally receive communication via email to the email address used to set up the application form account. Applicants should ensure the profile email address is kept up-to-date.

Selection process

Assessment of applications

All applicants are considered on an equal basis in line with the [University's Equality and Diversity Policy](#).

Once a complete application has been submitted with all required supporting documents, it is considered by the FARSCOPE Centre for Doctoral Training management team and a senior member of the graduate education team.

Applicants who have undertaken a transnational education partnership programme or top-up degree and meet the minimum academic requirements will not automatically receive an offer. In these cases, admissions decisions are based on the applicant's academic history alongside relevance of degree, and, if necessary, degree content and performance in key modules.

Applicants are considered holistically on their own merit and in competition with the rest of the applicant cohort during that academic cycle.

Interviews

Interviews form part of the selection process for this programme.

Suitable applicants are interviewed at the Bristol Robotics Laboratory by at least two members of the

FARSCOPE Centre for Doctoral Training management team.

Interviews focus on the applicant's motivation for robotics and multidisciplinary research, academic background, and breadth of interest within the field of robotics and autonomous systems. Applicants attending for interview receive a tour of the laboratory and have the chance to meet current students.

Interviews are used to assess whether the applicant has the necessary skills and capabilities to pursue their chosen programme, and whether the programme is appropriate to their interests and aspirations.

Interviewees based overseas are usually interviewed by telephone or Skype.

Interviews are normally conducted by two members of staff, at least one of whom is trained in fair and effective recruitment techniques. All interviews are undertaken in accordance with the [University's Equality and Diversity Policy](#).

Non-standard applications

We welcome applications from those with non-standard qualifications who can demonstrate knowledge, experience and skills developed in the workplace, or elsewhere, relevant to the programme of study. Please use your personal statement to provide further details.

Non-standard applications will be considered by the Admissions Tutor(s) for the programme on a case by case basis.

Decisions

Notification of decisions

Applicants will be notified by email when a decision has been made and decision letters will be available to view and print by logging into the application. If there is a deadline by which applicants must accept an offer of admission, this will be stated in the offer letter.

Offers

Offers will typically be made in line with the academic requirements set out above.

Offers made may be conditional or unconditional. An unconditional offer will be made to successful applicants who have already met the conditions and provided evidence that conditions have been met. Where academic or language requirements have not yet been fulfilled, successful applicants will receive a conditional offer outlining the requirements that must be met.

If an applicant is not selected to receive an offer for the course to which they have originally applied, we may offer the opportunity to be considered for an alternative programme in a related subject area. In such cases applicants will receive an email notification providing any alternative course options and asking whether they wish to be considered for these. It may be necessary for applicants to submit additional documentation in order for the application to be fully considered for an alternative programme. Details of the documentation required can be found in the [admissions statement](#) for the relevant programme.

Deferrals

Deferrals are not generally permitted for this programme. Applicants who wish to defer are encouraged to resubmit their application for consideration in the relevant year unless there are exceptional circumstances, which will be considered on a case-by-case basis.

Additional information

Extenuating Circumstances

If your education has been significantly disrupted through health or personal problems, disability or specific difficulties within your studies you can submit an [extenuating circumstances](#) form as part of your application.

The information provided on the form will be treated confidentially and will help us to fairly assess your

academic performance in light of your circumstances.

ATAS

Applicants who require a visa to study in the UK must first gain clearance through the Academic Technology Approval Scheme (ATAS). Please visit the [ATAS page](#) on the Foreign and Commonwealth Office website for further information.

Deposits

There is no deposit required for this programme.

Visa

International students coming to the UK to study full-time must apply for a student visa. [Tier 4 student visa guidance notes](#) are available on the University website.

Sponsored students

Sponsored students must upload a copy of their sponsorship letter in the 'Post-submission uploads' section of the online application, and must also complete and upload the [sponsorship authorisation form](#).
